EDITORIAL

We're back! What do you mean you didn't notice we'd gone? Anyway, you know what they say – some things are worth waiting for!

There have obviously been quite a few developments since issue 53 of 64 MAGAZINE, not least the incredibly successful launch of the Game Boy Advance in the UK – hurrah! Have you got yours yet? We have, and we've also got a whole pile of GBA reviews of the rather groovy launch titles!

Other features this issue include a mammoth E3 piece – Chandra was locked away in a cupboard for weeks after we got back from LA so that he'd concentrate on writing it, and well worth the cramped conditions and total lack of food we think it was too!

What else? Well... recently we've had a positive barrage of letters from befuddled N64 gamers out there begging us for help on the Rare masterpiece that is *Conker's Bad Fur Day*. Finally able to stand it no longer, we relented, and made Paul write a guide for it. It's big, it's detailed and it starts on page 60 – hope it comes in useful!

There's not really much else to tell you at the moment, needless to say we were all absolutely blown away by the GameCube titles on show at E3, and we're quite literally counting the days until the Japanese launch. Aside from that... well, as we've had twice as long to bring you the mag, we found ourselves at a bit of a loose end for a week or two, with nothing to do but play loads of games. Eventually the pleasure-overload just got too much (every tried playing on an N64 and nothing else for 14 hours a day, every day?) and so quietly, one by one, the 64 MAGAZINE team all sloped off and got themselves part-time jobs! Rest assured though that fairly soon most of us realised that there wasn't actually anything else out there to do that's more enjoyable than writing for an N64 magazine, and soon things settled back to normal. Anyway, enough mindless rambling from me, get on into the magazine proper and read up on all the latest news and gossip from the wondrous world that is Nintendo.

Roy Kimber,
EDITOR

This issue we have mostly been... getting ourselves part-time jobs!

Roy

Position: Near the middle
Editor Roy took the spare 'not working on 64 Mag' time too take up the occupation he'd always wished he'd tried: professional stuntman. He jumped off buildings, got into martial arts battles and managed to set himself on fire – and that was all just on the way to the job centre!

Game Of The Month:
Bomberman Tournament

Paul

Position: Left of centre
Paul was the only member of the team who didn't get himself another job in the lull period. He spent so much time working on the *Conker's BFD* guide that in the end he didn't have time for anything else. Then one morning we arrived in the office and he'd vanished without a trace! Weird...

Game Of The Month:
Excitebike 64

Alex

Position: Underneath
Canny Sub Alex took the chance to earn himself slightly better cash between issues, nipping out and getting himself a job as a paperboy (the wage for which is roughly three times his annual salary!) It was quite difficult persuading him to come back onto the mag!

Game Of The Month:
Mario Party 3

Nick

Position: Somewhere else
Arty-farty design chap Nick put his eye for detail to work as a freelance photographer. He was inundated with offers of work from several major tabloids, until they found he was using a disposable camera and getting the photos developed at the local branch of Boots!

Game Of The Month:

Tony Hawk's Pro Skater

In keeping with the 'violent injuries in games' theme started with *Excitebike*, we test out this isometric olliefest.

Ready 2 Rumble

We like boxing, we like beat-'em-ups, and we really like afros – but do we like them squished onto a GBA?

Castlevania

Yet another SNES classic checks in at the Old Games' Home that is the Game Boy Advance. How's it look?

Chu Chu Rocket!

Insane title, insane game! Rescue mice with rockets from marauding cats in this barking Japanese puzzle offering.

Konami Krazy Racers

That's quite a boast, isn't it? Just how 'krazy' is this game? We reveal the shocking truth.

Kuru Kuru Kururin

More fiendishly addictive Japanese puzzly action. Possibly unputdownable, if such a word exists.

Pinobee

Insufferably cute platform action, featuring lots of characters with disturbingly large eyes.

Rayman Advance

He's got no limbs, but he has got a rather lovely platform game to boast about, so it's not all bad news.

Mario Party 3

To paraphrase that pint-sized pop 'eccentric' Prince, 'It's time to get down and party like it's £49.99!'

Bomberman Tournament

Chase your friends and blow them up in this (you've guessed it) rehashed SNES classic.

1942

The venerable Game Boy takes delivery of an age-old arcade shooter.

BUT STILL NO PAL DATE

Following the runaway success of GameCube at this year's Electronic Entertainment Expo in LA, Nintendo has announced that its next generation console will be

launched in the US on November 5 at \$199. This is in stark contrast to the Xbox's launch price of \$299, which incidentally will happen three days later. With this month's third party announcements, Nintendo's plethora of triple-A titles, and a new mass-market price, the GameCube's future seems assured.

So what does this mean for the UK? Despite the fact that no specific European date was announced, a tentative 'early 2002' suggests that the Easter holidays are the most likely ETA. The \$199 price-point will translate to £199 at the most, although we suspect that

SONIC LOVES US!

While we're on the Sega trail, Sega of America CEO, Peter Moore, went on record as saying that he wouldn't be surprised if Sonic appeared on GameCube. Apparently Sonic creator Yuji Naka is a big fan of the GameCube hardware!

GameCube Gets EA-ten Alive!

EA JUMPS ON BOARD IN A BIG WAY

Just before E3, super-publisher EA announced that it currently has 10 titles in development for GameCube. It specifically mentioned versions of its franchise hits *Madden*, *FIFA*, *SSX* and *NBA Street*, but other titles such as *Harry Potter* and a 007 title can also be expected. EA's CEO Larry Probst had this to say on the matter; "EA takes a systematic approach to evaluating new hardware platforms, and we're very excited about the potential for the Nintendo GameCube." "Nintendo has a proven track

record in the areas of vision, innovation and execution – that positions the Nintendo GameCube as a major force in the videogame industry."

Despite announcing its support, only one of these titles was shown at E3. *Madden NFL 2002* looked good, but we've seen it all before. You can expect shots of the other games to start appearing towards the end of the summer period.

JINXED!

ACCLAIM GETS EXCITED

As well as showing a minute-long video of *Turok 4* at E3, Acclaim also showed an extremely brief snippet of a new game, nicknamed *Jinxed*. The video didn't really show much other than the main character, who is reminiscent of Juno from *Jet Force Gemini*. Nobody would say anything about the title, but project leader David Dienstbier was brimming with excitement over the video. This will definitely be one to look out for.

IT'S A MYSTERY...

...A certain publisher confirmed a 'certain number' of GameCube titles (in confidence) to us this month. We can't tell you what they are, but we can probably get away with hinting. Erm... his latest hair cut is terrible and he plays football... the other title has something to do with a boxing film... or maybe we're just making this all up. Who knows?

[Below] E3 was packed, but we think it was probably worth it!

JUST PERFECT

...Yeah, OK, so we kept insisting that the sequel to *Perfect Dark* would be at E3. And, yeah, OK, we were wrong. Rare probably did it just to teach us journalists a lesson. Despite this, insiders are still maintaining that the title is well underway and will be ready for the second half of next year. Ever get the feeling that these insiders are just planted hype-machines?

MARIO GOES SUPER

...Not really an essential piece of information this, but it gives us an excuse to talk about *Mario Kart* some more. When *Mario Kart* is released in the US and UK it will not be called *Mario Kart Advance*. Instead, it will be changed to *Mario Kart Super Circuit*... so there.

OOOOH, SEXY!

...Matsushita has announced that its sex-on-a-stick GameCube/DVD-player will be released in the US in the second half of 2002. This is very encouraging news, as it means that it will probably turn up over here as well... in 2010 maybe. But really, we could see it over here as early as Christmas 2002.

Set For 'Cube!

£149 could be a distinct possibility.

The only aspect of the GameCube which has not been talked about yet is the online capabilities. The fact that Sega has announced *Phantasy Star Online 2* (see this issue's E3 Feature)

"A tentative 'early 2002' suggest that the Easter holidays is the most likely ETA."

however, suggests that there is indeed something big going on in that department. When questioned on the subject, Nintendo executives merely replied that all would/might be revealed at a certain Nintendo show, to be held in Tokyo this August. Hmm, wonder what that could be? If you want to find out more, then flick over to the article on the next page.

Four Million For Launch

SO MANY CUBES AND SO LITTLE TIME

Nintendo's post-E3 financial report saw it predicting that it will sell four million GameCubes worldwide by March 2002. Obviously this doesn't include Europe, so those figures are for the US and Japan alone!

There were fears that Nintendo wouldn't be able to produce enough machines for the launch, but this latest announcement sees a very confident company. Production of the disc drives is currently underway at three facilities, each capable of outputting 300,000 units per

month. That's just under one million per month with two months still to go until the Japanese launch. As long as the other components are ready (most of them have been in production for a while now) there won't be any problems.

In the same report, Nintendo indicated that it expected sales of the GBA to lift group operating profits by 42%! Wow! That's a lot of extra profit...

What Colour Was Yours?

Since our last issue, the Game Boy Advance has launched in two territories. On June 11 the little console launched in the US, selling out immediately. Within one week of it being on sale, eager gamers managed to buy their way through 500,000 units, a record figure! Nintendo of America immediately supplied 100,000 more, with the June 22 UK release date seeing similar levels of interest in the new console.

XBOX UNDER FIRE

It seems as though Xbox is getting stick from all angles at the moment. Games analyst Shunji Yamashina said in an interview "nobody needs to buy an Xbox," while Ken Kutaragi, president of Sony, commented that Xbox games were just extensions of PC games! You see, it's not just us that's doing it!

DROVES OF TITLES

Interplay has got us all excited this month. The company behind *Baldur's Gate* will have GameCube titles 'arriving in droves.' Sadly Interplay didn't say anything more, but we'll keep digging for you.

JUICY BIT OF INFO

Die Hard: Next Generation, a first-person shoot-'em-up, will be coming exclusively to GameCube courtesy of Bits Corp. We met up with the ex-RIQA developers at E3 and chatted to them about the title. Sadly we just don't have the room to print the interview, but suffice to say that they love the GameCube's architecture and that we should be in for a treat with this one. More news as it breaks.

AM2 GET CUBED!

One of Sega's finest development teams, AM2, has revealed that it is working on GameCube. Fronted by Yu Suzuki, the infamous team has been responsible for titles such as *Ferret Challenge*, *Sega Rally* and *Virtua Fighter*. That makes a total of three Sega teams working on the mighty 'Cube!

NINTENDO SPACEWORLD 2001

NINTENDO SAVES THE BEST TIL LAST

Goodbye E3, Hello Spaceworld!

You may notice from our E3 Feature (go and read it, then come back, okay?) that there were hardly any GameCube announcements from the Japanese third parties. In fact, Kemco and Sega were the only companies to say anything at all. On top of that, where were *Mario*, *Zelda* and *Metroid*, huh?

It seems that this was all part of Nintendo's little plan. All of the Japanese companies that we spoke to (Konami, Namco, Enix, Capcom, Hudson, Atlus, Tecmo, Koei) said that they weren't allowed to say

[Right] As well as being pug ugly, this beastly shows the power of the GameCube.

anything. All of the big Japanese announcements are being held back for Spaceworld, which will be held in the Makahuri Mess Hall, Tokyo on August 23-25. Titles such as *Tekken 4*, *Soul Calibur 2*, *ISS*, *Resident Evil 0* and *Bomberman* are bound to show up at this show.

As for Nintendo, you can expect Miyamoto-san's new Mario title to make its debut appearance at the

"You can expect Miyamoto-san's new Mario title to make its debut appearance at the show"

show, which takes place three weeks prior to the Japanese launch! New playable levels of *Zelda* and *Metroid* should also be there. Here at 64 MAGAZINE, we're already arranging our flights over to the Far East!

Malice Likes Everyone

THE XBOX EXCLUSIVE THAT NO LONGER IS

You may remember reading about a game called *Malice* in previous GameCube features.

It was being developed by Argonaut, and was supposed to be the Xbox's Mario-beater. Now

it seems that Microsoft is no longer publishing the title, and rumblings from within the company suggest that it will now be a multi-platform title. Tut-tut, poor Microsoft...

And So It Begins...

THIRD PARTIES START ANNOUNCING

Following the tidal wave that was E3, various publishers have started to release details of what games they are developing. Activision, THQ, Midway and Ubi Soft have announced multiple titles, and here they all are.

Jackie Chan Adventures Activision
Tony Hawk's Pro Skater 3 Activision
Spiderman Activision
Batman: The Movie Ubi Soft
Donald Duck Ubi Soft
Largo Winch Ubi Soft
Rally Simulation Ubi Soft
Rayman Tribes Ubi Soft
Rogue Spear Ubi Soft
Tarzan Ubi Soft
Hot Wheels THQ

Jimmy Neutron Boy Genius THQ
MX 2003 feat Ricky Carmichael THQ
Rocket Power THQ
Rugrats THQ
Scooby Doo THQ
Spongebob Squarepants THQ
Tetris Worlds THQ
WWF Wrestlemania THQ
NFL Blitz Midway
NHL Hitz Midway
Spy Hunter Midway

Spy Hunter must be that mystery GameCube title that Paradigm is working on. Expect the announcements to keep rolling in.

Contrast Control

IS THIS A HIDDEN FEATURE?

After a certain web-site posted a news article about a hidden contrast control on the Game Boy Advance, Nintendo quickly responded by way of a press release. The switch, which can be found under the label on the back of the unit, is hidden for a purpose. It is not actually a contrast control but a voltage control. It adjusts the voltage passing to the liquid crystal display. The standard setting is where it should be - changing it will have the effect of brightening/dimming the screen, but it will also damage the display in the long run. We recommend that you don't touch the switch, however tempting it may be. If it all goes wrong, that's Ego down the drain!

64 MAGAZINE MOST WANTED

GAMECUBE

Everything about GameCube is perfect. It's tiny, well-priced, easy to develop for, has a dream-like interface and already has a library of top games in development. We already have ours on order from Japan. September can't come soon enough.

SPACEWORLD 2001

August 23 sees the start of Nintendo Japan's show, Spaceworld. This is the event at which Mario and Zelda will definitely be playable. Taking place three weeks before the native launch, this is where Nintendo will showcase its baby.

MARIO KART SUPER CIRCUIT

It's obvious now why Nintendo decided to hold this title back. It has come on in leaps and bounds since we last played it – it now looks and feels awesome, and as such is one of our most anticipated games. By the time you read this, we'll be playing it!

ETERNAL DARKNESS

Five minutes with Silicon Knights' psychological thriller was enough to put us totally in awe of Denis Dyack and his extremely talented team. Don't believe any bad reports that you may have read about this game. They are all written by people who obviously didn't play it.

PIKMIN

Miyamoto really can't do any wrong can he? Everything that he creates is magical, and Pikmin is no exception. Controlling

your little spaceman with up to 100 little Pikmin in tow really has to be experienced. It's just so much fun!

In Need Of New Glasses?

Dear 64 MAGAZINE,

I know you lot have been very busy of late, what with E3, the launch of the GBA and getting the lowdown on GameCube - the excitement must have been quite tangible. I do, however, have a complaint (ducks volley of abuse instinctively).

Firstly there has been no review of *Conker's Bad Fur Day*. We had a very good preview with the words "review next issue", but I've just finished that issue, and unless it's hiding in the ads section there's no review of *Conker's*. How come? (Eh? Are you having a laugh? Ten pages? Issue 52? 96%? Ring any bells? - Alex)

On your advice

I recently bought *Mario 64*, and got four player's guides, then I bought *Goldeneye*, and I've lost count of the number of player's guides I've got. Nearly every game I've got has a player's guide to accompany it.

I recently took the bull by the horns and bought *Conker's Bad Fur Day* on the strength of your preview, and I then proceeded to get stuck, thinking you'd help me out with a guide next issue, but nothing appeared. Then *Banjo-Tooie* came out and you said there'd be a guide for *Conker's* and a guide for *Banjo*. Come on guys, I can't be the only one who needs the player's guides, or

Hope Springs Eternal!

Dear 64 MAGAZINE,

I thought that I'd better start this letter off in the way that everyone else does: "I think your magazine is brill, and I really enjoy reading it". It's just the right size for hiding between the pages of my history textbook when I'm supposed to be revising. Thanks for taking that into account lads!

I wrote to talk to you about the gaming death of the N64. I don't understand why everyone is so upset about it. For one thing, there will be clear-out sales galore! I was able to pick up *Zelda: Ocarina Of Time* for £15 from GAME. A couple of weeks ago, I nearly wet myself when I walked into HMV in London: *Turok: Rage Wars*, *South Park: Chef's Luv Shack* and *Wipeout 64* for £4.99 each!

I don't get much pocket money at all, and can't get a job because I live in a rural area (paperboy's already taken!) These sales therefore will help people like me beef up our measly N64 collections because we can't afford the £49.99 price tag that hangs off most N64 games. I was so looking forward to *Conker's Bad Fur Day*, but £60? Come on! Did Rare have to go out to darkest Africa to hunt the game down or something?

Finally, a game comes along that ditches Nintendo's 'baby' image, and no-one can afford it!

If the PSone has a bigger selection of games at £10 a pop at the moment, people are bound to appreciate it, because they won't want to pay vast sums for games on the N64. Sadly then, classics such as *Zelda*, *Perfect Dark* and *Conker's Bad Fur Day* might be forgotten.
Tom Hockin, Shropshire

First of all Tom, great to hear you're reading our magazine instead of concentrating on your schoolwork - that's true dedication! You're also spot on about the avalanche of cut-price games waiting to be picked up by eagle-eyed bargain hunters across the land as the N64 nears the final curtain. Happy hunting one and all!

It's fairly unlikely that the classics you mention will be forgotten though. When the GameCube finally shows up, you can expect next-gen, all-singing, all-dancing versions of all the most memorable N64 titles to appear on it, as well as cracking original titles too. On the subject of *Conker's Bad Fur Day* - don't get too angry at Rare, because although it was our favourite 3D adventure developer that programmed the game, it wasn't Rare that actually published it, and thus the blame for the £60 price tag lies somewhere else...

Anyway, because of your rural, not-currently-working plight, we thought we'd be nice and send you some Star Letter-style freebies! Hope you enjoy 'em!

there wouldn't be a market for them.

Moan over... did you get many surprises at E3? Will GameCube hit UK shores by Christmas? Will the big N still schedule delays? Were there peripherals on show at E3? Colin Morgan (40), Bridgend

We've been racking our brains here in the 64 MAGAZINE offices, and can't work out how you missed the frankly mammoth *Conker's* review in issue 52. Still, you've bought a quality game, so no harm done.

As far as player's guides go, you'll be chuffed to learn that there's the first part of a *Conker's* walkthrough elsewhere in this issue, which took so much hard work to produce that Paul's arms fell off. Twice. Enjoy! All the E3 gossip is contained in the gargantuan E3 feature in this very issue, so read on and prepare for a few tasty rumours and some luvverly screenshots.

More Mindless Violence And Swearing Please!

Dear 64 MAGAZINE, Is it just me, or has Nintendo stopped coming up with new ideas? (It's just you, but carry on - Alex) I bought one of your magazines and for some reason it's still all the boring old games. (I like your mag though). Nintendo is not coming up with anything new, it's just all the same stuff - either sequels, remakes, or transfers from PlayStation. When is Nintendo going to stop making Mario games? NOT ONLY KIDS PLAY N64!

Now, *Conker's Bad Fur Day*, that's a good game. The first day it came out I bought it. Rare put new ideas in it and I think people want more games like that, as well as better sports games. We've got *Mario 64*, *Banjo-Kazooie* and *Donkey Kong* - why do we need more games like those? We want more titles with violence and gore!

If they don't start making any new games people will stop buying N64 games!

Come on programmers, USE YOUR BLOOMIN' IMAGINATIONS!

Michael David, NSW, Australia

It's a fair point Michael - there are a lot of sequels and ports available on the N64, but surely that's true of any games machine? As for the console

being aimed at younger gamers, well, there are games available for all age groups on the N64, ranging from the much-maligned

Pokémon series to the really-quite-scary 'grown-up' games like *Resident Evil*, *Shadowman* and, as you rightly point out, the filth-fest that is *Conker's Bad Fur Day*. The point is that Nintendo is trying to

cater for all tastes and ages, but the younger gamers are spending more money on franchises like *Pokémon*. Developers never set out to make dull games, and there are still enough talented and imaginative coders out there to keep us going for a while yet.

A Satisfied Customer

Dear 64 MAGAZINE, I have been reading for about two years now. I have always been impressed by the honest reviews and overall quality of the mag. However, as everyone knows, you recently became a multi-format Nintendo magazine. I own an N64, and I have noticed that N64 articles in your mag are rapidly decreasing! In one issue, most of the 64 Showcase was GBA. This is understandable since this was the launch of the GBA in Japan, but now only about two games out of the many you review in your mag are N64. I would like to know if this is because the N64 is dying, or just GBA

excitement? Wouldn't it be easier to just have a sister mag for GBA and GBC and leave 64 MAGAZINE to N64 and (in the future) GameCube? As for the CD vs cartridges debate, I think that CDs are better, because although they have to load, they reduce the price by £10-20. The reason for CDs being better is not "because they look better". I think Dean Foster was saying what PSOne/2 owners are saying about GameCube. You should judge a machine by its games, not by how it looks (not that the PS2 is gorgeous by any means!) Other than my small quibble, brilliant mag, keep up the good reviews. Craig F, via email

Are you related to Eighties cinema cop Axel F? Brothers perhaps? No? Oh well, it was worth a shot... The reason that there are less and less N64 reviews is simply because there are virtually no more new games coming out for the N64. Having said that, we are dead excited about the GBA, and, as for the GameCube, well, it looks set to blow everything else out of the water, so you'll really want to

Comedy Of Errors?

Dear 64 MAGAZINE,

First of all I'd like to prevent you from stopping reading right here by saying what a fantastic brilliant magazine you produce. Now, I'd like to point out some of the foolish mistakes that I, and your other readers, are making.

1. People think you write the games.
2. People think you make a bad Nintendo magazine.
3. People think the N64 is dead (there is a grain of truth in that).
4. I passed up an easy opportunity to get a Game Boy Advance.
5. I got a letter published in Memory Card Losers.
6. I am bothering to write this letter.
7. We are unprepared for the tsunami that is GameCube.
8. Nintendo made a pig's ear out of its marketing with the N64.
9. Sony made a pig's ear out of the PlayStation2.
10. Sega made a pig's ear and a half out of the Dreamcast.
11. *Power Rangers: Lightspeed Rescue*, *Carmageddon*, almost every single golfing game ever made...
12. Less than half the world will read this magazine.

I just thought you ought to know.
Edward Plant, via email

Hmm... thanks for that, Eddie. However, we'd like to make it clear that:

1. The GameCube is a great next-gen games console, not a towering chunk of the Pacific ocean that flattens Hawaiian people's houses in the dead of night.
2. If you passed on a GBA, you are a fool.
3. The N64 will live on forever in the hearts and minds of those enlightened souls whose lives have been, and continue to be, illuminated by its greatness. At least until the GameCube arrives...

be around when the console hits the UK! CDs are cheaper, admittedly, but the games are (by and large) significantly smaller and less complex than their cartridge counterparts. You are right though – a console should be judged on what games it boasts, not what medium it uses, or its design. Apart from the Atari Jaguar, for which there can be no excuses.

Pokérant

Dear 64 MAGAZINE,

What is it with you and Pokémon? I know, I know, you bunch at Nintendo create it, (Just for once, we'll ignore that – Alex) but that doesn't mean you have to talk about it week in, week out.

I mean, why the hell would anyone want to produce loads of Pokémon games, and why would anyone want to buy 'em?

I reckon they're pants. Useful only as an item to cure a wobbly table! It started off with just a couple of games (that even I could handle) but now there are loads: *Pokémon Puzzle League*, *Pokémon Snap*, *Pokémon Stadium*, etc. It's getting pathetic!

Actually I don't own any of them (good riddance!) but I've played them on my mate's N64 and they're crap, so I'd like you to stop boasting about Pokémon games that suck!

If you ask me, *Micro Machines*, *Premier Manager*, *Worms: Armageddon*, *Zelda*, *Virtua Athlete* and *TWINE* are the best, but then again, you probably don't agree. Well, I'm off to win the World Cup again...

Glen Pawsey, Hertford

Woah there! Someone's got a bit of a bee in their bonnet (as Roy's Grandma used to say) about Pokémon then! We don't chunter on endlessly about the collectable critters in this mag! Instead, we try to only dwell on the little blighters when there's one of their games to review. There are loads of

Pokémon games because people keep buying

them, and just because you don't like the games, that doesn't mean a great many other readers don't feel differently. Each to his own, as a wise man once said...

Games Designer Of The Future?

Dear 64 MAGAZINE,

I am an avid reader of 64 MAGAZINE, and I am writing in the hope that you might be able to help me?

Having played the majority of N64 games and been disappointed by the quality, I have devised a game which I think will rate higher than any title Nintendo can currently offer!

The stumbling block for me is how to further this idea. I am hoping that you can advise me on who to contact and how to present my idea. Any advice and help would be appreciated.

Stephen Bolton, Brixton

This is a tricky one, and we're afraid the chances of your idea reaching the shop shelves are pretty slim. Games developers spend months on end chucking ideas around before they finally decide which games to put into development. To convince them that your idea is worth pursuing, you'll have to have a truly inventive new game genre, or a revolutionary control system, or never-seen-before level designs (and lots of them).

Occasionally, games that started life as doodles on the back of an exercise book can make it to the big time, but it can take years (*Worms*, for example, was in development for several years before it finally went on sale.)

Develop your idea as far as you can, with drawings and storyboards to illustrate it, then you need to start ringing round the various software companies to see if they'll take a look and to check who you should send it to. Stick at it, and you never know! Good luck!

14 Starfox Adventures: Dinosaur Planet

16 Eternal Darkness

StarFox Dinosaur

Fox is back, but this time he's on foot!

Nobody will ever ignore Miyamoto-san again. Months ago he mentioned how he would like to see *StarFox* characters in Rare's *Dinosaur Planet*, but no one ever imagined that it would happen, and certainly not that it would be this far into production.

Fox, Peppy and Slippy have returned. The scene is set eight years on from their previous adventures. It seems that Falco has disappeared off on some solo mission, but you

never know... he may turn up to help at some point in the future.

Trouble has broken out on *Dinosaur Planet* – an evil General Galcian has brought in his troops and is holding the normally docile dinosaurs captive. You control Fox on a quest to save the planet in a style akin to *Zelda*. The similarities go further than the aesthetics – the battle engine and the usage of items is also very similar. One of Fox's weapons takes the form of a long staff. Used correctly, this staff can help Fox to get up to hidden areas. All he needs to do is thrust it into the

correct area (represented by a pad on the ground) and the staff will carry Fox, pogo-style to his destination. You can expect multiple power-ups to be available, as well as magic spells. Fox can also use his staff as a standard weapon (whacking his enemies) and a tool for levering items (moving rocks, etc)

Dynamic Duo

Along the way you find a young dinosaur by the name of Tricky. Somehow the Tricerotops Prince has escaped from the evil clutches of the ground troops, and he's probably the only native help that you're going to get. It's more than likely that the two characters will learn special combination moves, not unlike Banjo and Kazooie.

Rare hasn't revealed much more about the game other than details on some of the sub-characters, which you can read about in the boxout below.

Despite this, what has been shown looks fantastic and believe us when we say that it plays just as well. It doesn't look like *Zelda* will be finished for a while, but this will more than make up for it!

ETERNAL DARKNESS

"From beneath the secrets of time and space, the story of the Eternal Darkness unfolds, echoed through twelve chosen souls. Twelve people, their fates inextricably entwined with the destiny of the human race, fight an incomprehensible war against the malignant regime of the Ancients."

You can just tell when a game is going to be something special. It's hard to explain, but it's just a feeling that you get – the same feeling that accompanied your first look at Mario 64 or Pilotwings 64, yet *Eternal Darkness* is nothing like either of those past Nintendo favourites.

Take a glimpse at the screenshots on these pages. Sure, it looks nice, but it's just *Resident Evil*, right? That dismissal is one which was murmured by many an E3 visitor, even by so-called 'experienced games journalists' who should have known better than to judge a book by a distant cover.

Thankfully, 64 MAGAZINE took some time out to talk to the man in charge, and spent some quality time with the most promising title at E3 '01.

Kept In The Dark

Woah, hold on a second! *Eternal Darkness* was supposed to be one of the N64's last great hopes. What happened there? Well, as we reported months ago, N64 titles haven't been selling particularly well – *Conker's Bad Fur Day* had terrible sales figures (compared to what it deserved), and it would have been damaging to release a potentially even more adult-orientated title into the games market.

To be honest though, the decision to change formats was probably made long before this happened. No doubt Nintendo saw the problem coming, saw the potential of *ED* as a GameCube launch title, and decided

that it would fit in perfectly with its new approach. *ED* most definitely is a great example of the much-touted 'Nintendo Difference.'

Silicon Knights' President Denis Dyack wouldn't comment on how long the GameCube version had been in development, but he assured us that it was heartbreaking for the team to stop work on the N64 version after they had achieved so much.

Cube Vision

The latest version of *ED* uses a similar story line to its 64-bit cousin. In fact, much of the game is the same – from the settings, through the battle system, to the insanity meter, everything is very familiar. In line with this, you would have thought that the developer had used some sort of porting software, but *ED* GameCube has been written from the ground up, especially for the hardware. Boy does it show! Every graphical effect that you could dream of (well, nearly) is in there. Real-time light sourcing, ray tracing, reflection mapping, bump mapping, rolling fog, particle effects, facial animation – you name it, it's got it. The graphics engine as a whole is so powerful, that the in-game graphics rival those of the FMV sequences in the N64 version!

[Above] This shot shows just how detailed lighting effects are on the GameCube.

Whereas *ED* N64 ran at 25-30 frames per second (an astonishing achievement for an N64 game, and it was in hi-res model!), its big brother runs at a constant 60fps, resulting in a breathtakingly smooth and lifelike experience. Even with 20 enemies on screen the action will never fall below this high standard. All of this is displayed in full 24-bit colour. This really makes a difference to the game. The range of hues apparent in the textures and the lighting effects creates one of the most believable environments yet seen.

Okay, so you know by now that *ED* is a technical marvel, but what makes it so special? Surely 64 MAGAZINE hasn't been swayed by pretty graphics and tech specs?

Wish You Were Here

If you watch *Eternal Darkness* for about 10 seconds (especially the Alexandra levels), you could be forgiven for thinking that it is just another *Resident Evil* clone. Alexandra runs around an old mansion picking up medikits and blowing zombies' heads off, yadda, yadda, yadda. Watch the same level for 10 minutes and you'll begin to see what it is that makes this so fine. Silicon Knights has definitely done its homework. Each section of the

[Below] Alexandra kept forgetting to ring MFI about her faulty mirror.

game is set in a specific time period, in which you will take control of a certain character. Pious Augustus is a Roman soldier, complete with all the plumes and armour that you would expect from a warrior of that period. He explores a castle possessed by evil, and is armed only with a broadsword. The environment is authentic not only in its attention

to detail, but also in its ambience. You just know that if you were in a haunted castle, this is what it would feel like. The moody soundtrack (in Dolby Surround, of course), the popping torches, the clunking of armour – Factor 5 has done wonders with the MusyX sound tools, and Silicon Knights' sound wizards have used them to their full potential.

Then you'll be wanting this...

18

[Above] Not really very homely is it, this place? Atmospheric or what?

Psychotically Thrilled!

One of the main features of *ED* is the Insanity Meter. This is represented by a green gauge on the left of the screen. Every time you leave an enemy to its own devices instead of killing it, your sanity level goes down. Your character starts to worry. That worry slowly turns into paranoia, which slowly drives your character insane. You can see them looking around at everything, their heads turning this way and that to investigate every sound and movement. Their faces change as well. As with the rest of the game, facial animation plays a big part in the realism stakes – the whole face changes depending whether they are happy, shocked, scared or paranoid.

Once your Insanity Meter is empty, anything can happen. Silicon Knights has only revealed a few of the possible consequences, and hopefully it will stay that way. Disclosing any more information will only ruin the game for everyone

else, but we'll let you in on one of them. As Alexandra walks down a narrow corridor, she begins to feel a bit weird. The next thing she knows is that her arm has fallen off! Over the next couple of minutes, parts of her body simply drop off, until she is dragging her headless, legless body around with one arm. At this point the player has no idea what is going on. Then, in the blink of an eye, Alexandra is back at the start of the corridor, health replenished. Other examples are much more

subtle, and will have you questioning what is real and what is in your head.

There is so much more to talk about in this game, amazingly even a four-page preview doesn't provide enough space to tell you about everything that we saw. Check out the interview below for an insight into the minds of the developers, and check out the in-depth preview, which will follow in just a couple of months.

Be afraid... Be very afraid...

[Above] Ugh! What the hell's that thing? Let's hope that whatever it is, it's well and truly dead, anyway!

[Above] Ah, a charming fireside chat with three undead skeletons with one thing on their minds: your death!

In The Olden Days...

It's when you put the two versions of *ED* next to each other that you realise just how powerful the GameCube is. The intricacy of the character models in particular stands out. Each character is made up more polygons than an entire scene from the N64 version!

1) You can even see the muscles flexing in Pious's neck in the GameCube version!

2) Every object in the room is now made of polygons, resulting in fantastically gloomy rooms.

3) Among the extra layers of textures, which can be applied is bump mapping. Stone walls have never looked so real.

INTERVIEWED BY: Chandra Nair

Just for the record we would like to say that Denis Dyack has to be the most pleasant, courteous and downright helpful person in the industry who we have ever come across. If you ever meet him, buy him a beer... what the hell, buy him two!

64 MAG: IS IT RIGHT THAT SOME OF YOUR EMPLOYEES HAVE COME FROM THE FILM INDUSTRY?

DD: Silicon Knights is trying to adopt traditional forms of media, and that does mean studying film, and it does mean reading a lot of books. We're trying to incorporate those linear forms into non-linear forms like computer games.

We have dynamic cameras, we have things that change depending on what the person does. If you look

Denis Dyack

[Above] *Eternal Darkness* guides the novice player through easier early levels, so you learn the game as instinctively as possible.

at *ED* (*Eternal Darkness*), the graphics will grab you, and the controls hopefully make it very easy for you to sit down and go "this is easy to play." Beyond that, we've got this incredibly detailed, arcing storyline, and people will realise that there is more to this game than meets the eye and they'll really want to find out what's going on here.

When the game launches we think that it's going to appeal to adults. People will say "this is a mature game, but it's not because of the violence at all."

64 MAG: ARE THERE ANY FEATURES, WHICH COULDN'T GO IN THE N64 VERSION DUE TO HARDWARE LIMITATIONS, WHICH YOU'VE NOW BEEN ABLE TO PUT IN?

DD: Oh absolutely. The true vision of the game can now come through. With the N64 version we were getting frame rates of between 25-30fps (frames per second).

64 MAGAZINE: FOR THE NINTENDO 64, THAT'S A GREAT ACHIEVEMENT THOUGH.

DD: Sure, for the N64 running in high resolution, that was great. With the GameCube, we're running at 60fps in 24bit colour. Load times are actually faster on the GameCube than they were on the N64 (!) We found that when we were playtesting it we had to put an eighth of a second delay in, because when the rooms switched so fast, they were cognitively shocked by the change. So we put a sound effect in, and a nice fade-in and said okay, this is better. We use a lot of techniques to make sure that people never see loading times.

With the N64 we were very limited with what we could do with the cinematics. Now our stuff is just as good as the FMA stuff that we used to pre-render. We've added more Insanity Effects, we added more animations. The number of polygons on the character models is now what we used to use for an entire render (whole screen) on the N64. Gameplay is pretty much the same, which is timeless in my opinion. The story didn't change at all. We can have more enemies on screen if we want to – by the time we get done with the optimising, we estimate that we will be able to get up to 15-20 enemies on-screen without dropping below 60fps.

GameCube is a hot machine. GameCube is incredible."

Three Game Boy Advances From GAMESTATION!

GAMESTATION is the largest independent videogames retailer in the UK. In November, to celebrate their eighth anniversary, the company launched a mail order service for people who need games NOW but can't get to one of the many GAMESTATION shops – so now you can buy, sell and trade games without ever leaving your house! This has already been a massive success because of the huge range of games they have at extremely competitive prices.

Now GAMESTATION has decided to give lucky 64 MAGAZINE readers the opportunity to win a massive a really cool prize – one of three brand new Game Boy Advances complete with one game!

All you have to do to be in with a chance of winning, is answer this simple question:

What service has GAMESTATION just launched?

- A A service wash
B A mail order service
C A military service

To enter, simply fill in the entry form below and send it to 'I'm Ready To Advance' Compo, 64 MAGAZINE, Paragon Publishing, St Peters Road, Bournemouth, Dorset, BH1 2JS.

If you're not lucky enough to win one of the GBAs, or fancy buying something else, you can contact GAMESTATION by post at the following address: GAMESTATION, PO Box 47, York, YO30 4YF; by phone on: 0870 8761444; or find them on the Internet at: www.gamestation.co.uk.

**IM READY TO
ADVANCE**

Remember. *Remember,* THE FIFTH *of November*

[Below] These special videogame experts were on hand to dole out vital information to passing journalists. Yeah. Right.

Nintendo's Fourth Coming

As we finally touch down in LAX airport, it suddenly dawns on us that this is what the past six issues of 64 MAGAZINE have been leading up to. Let's face it – if you've stuck with Nintendo, then you can consider yourself to be a truly dedicated fan. The faith involved is almost religious in nature, relying on stories, rumours and promises of something untouchable. Here at 64 MAGAZINE, it goes further than blind faith. We knew that Nintendo would come through, and finally, we have the proof that you've all been waiting for for all this time.

Nintendo will launch the GameCube in the US on 5 November 2001 at a mass-market price point of \$199 (£155). Microsoft, on the other hand, will launch Xbox in the US on 8 November at a \$299 (£230) price point. At first glance, this may well go some way to explaining why it was that Nintendo stole the show at E3, but now consider that Nintendo of America didn't announce a price until after E3 had finished. Evidence enough of the 'Nintendo Difference.'

The Nintendo Difference

So here they are – the final stats for the GameCube console. You may notice that the clock speed of the Micro Processing Unit has shot up, whereas the clock speed of the System LSI has dropped. Check out this month's Showcase to find out exactly why this has happened. Rest assured that it was for a good reason, and one that makes the hardware more stable than ever!

ber

Although the games on the Nintendo stand completely bowled everyone over, you'll probably notice that very little was said by companies outside of the Nintendo camp. To be perfectly honest, this was Nintendo's show. The big N and its second parties showed off their wares, but the most that could be squeezed out of most of the third parties was a tight-lipped "watch this space." Don't let this set the alarm bells ringing however. To quote Nintendo's press release: "In the days and weeks to come, expect major announcements from publishers that have been waiting to announce their support for the Nintendo GameCube." It seems that Nintendo has purposely held back the third parties' announcements. Check out this month's Showcase for all the latest news on this issue.

Despite the fact that the majority of publishers and developers wouldn't say a word about their particular titles, they were only too happy to praise Nintendo. From big-time Nintendo supporter Konami, to newcomer Rage (not even developing for GameCube... or are they?) not a bad word was said. It wasn't just a case of the games community acknowledging GameCube, but also putting a general nose up

to Xbox. When questioned as to his opinions of GameCube, Jon Murphy of Konami replied: "It is without doubt a force to be reckoned with... much more so than some other next generation platforms that we could mention." Comments like this were not uncommon among the third parties. Another plus for Nintendo came in the form of Microsoft executives apparently doubting their own tactics. Rumours soon spread around the halls that Microsoft was seriously rethinking its broadband strategy. Considering the fact that this was one of Xbox's major selling points, you have to wonder what this will do to developers' confidence in Microsoft's ability to provide the service that it has touted for so long.

Le PS Deux Resistance

Nintendo's stand was constantly crammed with visitors, all desperate for a chance to get hold of the new controller and an all-too-brief look at the latest offerings from NCL and its second parties. The same couldn't be said for Sony and Microsoft. While those playing *Eternal Darkness*, *Pikmin* and *Rogue Leader* had to be torn from the pads, visitors to the Xbox stand were putting down the plastic interface long before their time was up. As far as Sony was concerned, there were times when its stand was virtually empty!

[Above] *As you can see, the PlayStation2 stand was pretty empty for long periods of E3 this year. We can't think why... oh hang on - Nintendo unveiling the most eagerly-awaited console in ages might have been a factor!*

>> The Box of

The Big Screen

If there is one word that immediately sprang to mind when we walked into the Nintendo booth, it was: 'BIG.' Nintendo had the biggest stand at the show, and a large portion of the walls were covered in projection screens, which were constantly bombarding us with videos, holograms and spectacular lighting effects. It was actually a little surreal to have an enormous, green Yoshi towering above you, but the look on his face said it all.

Most of the videos shown on the stand were future GameCube titles that hadn't made it as playable demos. You can find out more about these in the 'Straight To Video' boxout.

Stand 2816. A place of invention, innovation and technical prowess – more importantly, a place to fill you with a sense of awe, magic and wonder, three things that are so rarely found in today's polygon-obsessed gaming community.

Stand 2816 existed as a huge section of the Los Angeles Convention Centre, the biggest stand at this year's Electronic Entertainment Expo. As we were drawn to it (its sheer planet-like size meant that it had its own gravitational pull!) the nausea-inducing beeps, whistles and "game overs" that fill the giant room faded away. From the moment we set foot in Stand 2816, we were no longer at E3. In fact, we forgot that E3 even existed. This was the world of Nintendo, and we may never have left!

Do you remember the first time that you visited a theme park, say Alton Towers or Thorpe Park? Remember that buzz hitting you as you walked through the turnstile into another world? That was the feeling that Nintendo achieved this year – no other stand even came close. From the water feature to the talking *Mario* and *Wario* Roulette game, to the huge video screen, to the *Chemical Brothers*-esque DJs, to the rows of glass cases, to the games with their individual booths – every last detail smacked of professionalism and a company that knew exactly how good it was.

Nintendo's entire attitude was summed up by its stand. Flagging the 'The Nintendo Difference' slogan, the big N succeeded in showing everyone that technology is no longer an issue. The difference comes in the games, and the games were awesome. Other lesser companies, perhaps not quite so confident of their wares, used scantily clad booth babes (and all manner of other gimmicks) to get people to look at their assets. Nintendo chose to place its knowledgeable, well-dressed female helpers where they were most needed: by the consoles.

And so we come to the reason that Stand 2816 was jam-packed for just about every second of the three-day event – the games. The titles that any visitor immediately saw were the playable versions of *Luigi's Mansion*, *Pikmin*, *Super Smash Brothers Melee*, *Starfox Adventures: Dinosaur Planet*, *Kameo*, *WaveRace: Blue Storm*, *Eternal Darkness*, *Star Wars: Rogue Leader* and *Kobe Bryant Basketball*.

Spin That Wheel!

Yet another attraction at the Nintendo stand was a huge round roulette wheel, which faced you as you came in. The wheel acted as a table, with room for 12 people to sit down. There were, in turn, 12 perspex cases, one for each person. A four-foot tall Mario talked to the audience about nothing much in particular, and after much jeering, cheering and whooping (only in America), one of the attendants spun the wheel. Once the wheel stopped, the people sat around the wheel got to keep whatever they found in front of them. Among the prizes were squeezable GameCubes, Game Boy Advance models and one real Game Boy Advance! As you would imagine, the queues were horrendous.

Delights

[Below] Hmmm. Mario's looking distinctly unwell in this shot. Let's hope he didn't overdo it at the Nintendo E3 parties!

and watch the games which, for one reason or another, only made it as video sequences (see our 'Straight To Video' boxout). Finally, you could sit back and catch your breath, only to realise that something was missing. You haven't even gone through to the GBA section yet!

Enough of all this talking – let's check out the games...

[Below] Never afraid to make the most of an opportunity, Nintendo's E3 merchandising stand was massive. Ker-ching!

It's testament to the impact that these games made, that there was not even a whisper of "Where's Mario, Link and Samus?" No one cared.

You could literally have spent weeks playing the games in this section, but eventually (probably after one go) the friendly but assertive hands of the booth babe would prize the pad from your sweaty grip. From here, you could walk past a series of cuboid glass cases, containing glistening examples of future hardware, such as the DVD-compatible GameCube (see 'This Is Hardcore' boxout) and the broadband adapter. Then you could step back

This Is Hardcore

We spotted something very special in one of the glass cases – something so special that it made us contemplate getting our swag bags out! There were four glass cases lined up next to each other, holding a Game Boy Advance, a GameCube, a Game Boy Advance linked up to a GameCube, and a chrome-coloured GameCube. Woaahhh! But hold on a second... it looked a bit different, with buttons down each side and an LCD display on top, and it was a little bit taller than usual! Grrrr, it must have been Matsushita/Panasonic's GameCube DVD-player. It might even be out for launch in Japan (dribble, dribble).

A hardcore piece of kit if ever we saw one!

Nintendo An

CYNICAL STATEMENT:

Nintendo is all about Mario, Zelda and Pokémon.

64 MAGAZINE Says: Hmmm, that's funny – we didn't see any Mario, Zelda or Pokémon games anywhere...

Luigi's Mansion

The Italian underling returns to clean up after Mario!

[Below] Luigi is visited by the Ghost of Videogames Past. Spooky!

We were expecting Luigi to make an appearance, after all, Miyamoto-san had said as much, but we weren't expecting him to star in his very own game!

Despite being playable, very little has been revealed about this game. It seems that Luigi has inherited a mansion, which is inhabited by an army of ghouls and goblins. Armed with a vacuum cleaner and a spotlight, our favourite green plumber ventures inside to deal with them. The boos in question need to be stunned with the flashlight (controlled with the joystick) before they can be sucked in with the vacuum cleaner (the power of the vacuum is controlled by the analogue

R button). Everything in the surrounding area, from dust particles, to curtains, to mirrors, is affected by the flashlight and the vacuum, with an astonishing degree of realism. Add to this the fact that you can upgrade to a water hose and a flame-thrower!

Pikmin

Guess what's at the bottom of the garden?

This game had to be the most pleasant surprise of the show. Miyamoto-san's latest pet project sees you taking the role of a little alien (we'll call him Burt) who has crash-landed on a strange planet, inhabited by the Pikmin. With his ship smashed into a gazillion pieces and scattered all over the place, escape seems impossible. Thankfully the Pikmin are friendly creatures who agree to help Burt gather up the remains, while they tackle the various evils strewn about.

With up to 100 Pikmin at your command, you begin to see what Mr Miyamoto was messing about with in the Mario 128 demo. Each Pikmin can be commanded to attack a specific object, be it a spider, a bug or a solid

obstacle like a wall. A lone Pikmin won't be much good against a huge bug, but 20 of them will soon bring it down.

The gameplay is nigh-on perfect, and the photo-realistic textures (straight from Shigeru's garden!) make it pure eye candy.

SWERS All

Super Smash Bros Melee

Now That's What I Call Insane!

Rumours of this game were flying about in the week leading up to this event, and thank goodness they were true. At first glance, *Super Smash Bros* doesn't impress in the graphical stakes – the characters are small and the textures seem a bit plain. It's when you see the characters close up that you realise just how detailed

they are. Directly comparing them to the original game is the only way to fully appreciate the difference.

The character selection has been bumped up significantly, and there are plenty of new modes to try out. Home Run Contest, Tournament and Snapshot Mode all allow you to win items, which take the form of fully

rendered models of Nintendo characters. One of the video screens ran a section of the game, whereby all of the models are shown, one after the other. Scores of non-playable characters were also on display, including Kid Icarus and Sonic! Considering the intricate detail on these models, it's entirely possible that they will be secret characters.

Wave Race: Blue Storm

The most realistic water effects ever seen! Towel not included.

The N64 version of *Wave Race* boasted water effects so accomplished, that not even arcade machines could come close. Even so, developer NSTC has somehow managed to improve upon them to the extent that you won't be able to differentiate between the in-game visuals and the real thing. Every single physical quality of H₂O is imitated in real-time. Refraction, reflection, spray, surf and splash are all represented. Real-time weather conditions such as wind and rain

also make an appearance – raindrops even drip down the screen, affecting the clarity of the picture.

NSTC really has worked hard to get water effects this advanced, so much so that it has had to lower the frame-rate to a constant 30 frames per second. Don't expect to see anything like this on the Xbox – it just won't happen.

Blue Storm handles even better than the original, and with a new controllable

Turbo Boost you can choose exactly when you want that extra kick.

[Above] GameCube's graphics processor gets a workout...

[Above] The level of clarity and detail will take your breath away!

Straight To Video

There were more than enough playable GameCube games available at E3 – having anymore would have been pointless! Even so, it came as a shock when we realised that *Zelda* and *Mario* were nowhere to be seen. Thankfully the huge video screen told a slightly different story. The five-minute long video showed off a handful of titles including *Zelda*, *Metroid*, *Raven Blade*, *Mario Kart*, *Donkey Kong Racing* and *Mickey Mouse*.

Sadly Nintendo was not willing to show anything more from *Zelda* – the video being shown was merely the

Spaceworld 2000 footage. All the other demos were pre-rendered sequences, using in-game models. *Metroid* looked gorgeous. All too brief scenes of Samus being surrounded by huge bugs were all that we need to refuel our excitement for this Retro-developed title. Another title from Retro is the *Dungeons & Dragons*-style RPG, *Raven Blade*. The potential for this title is enormous, but with its potential comes a far off release date of late 2002. Even that seems ambitious.

The *Mario Kart* demo was more of a teaser than anything else. Fully rendered versions of

Mario and Luigi in go-karts slid into view and battled it out on screen before disappearing out of sight. The kart models are the same ones used for the bonus items in *Super Smash Brothers*. *Donkey Kong* showed off a similar setup, albeit with lush backgrounds and a multitude of vehicles including rhinos, swordfish and wasps.

Last of all was *Mickey*. Apparently Capcom is handling this title, although the company won't openly admit to it. Dancing cutlery scenes, reminiscent of those in *Fantasia*, showed off the incredibly slick animation that's possible with the hardware.

StarFox Adventures: Dinosaur Planet

The Arwings are back, but where's Falco?

Word had already leaked out that *Dinosaur Planet* had undergone a dramatic change, but to be honest, the change is quite subtle. The main character model (Fox McCloud) is very similar in design to what he was before. Also on hand are some other members of the *StarFox* team. Slippy and Peppy are there to offer tactical advice and advanced gadgets, while a new character in the form of Rob The

Robot is available to supply you with any items that you might need.

Fox's main weapon at the moment is a magical staff, which can also be used to solve various puzzles. The *Zelda* influence definitely shows through in this respect – in one section Fox places the staff in a slot in the ground. The slot powers up the staff and allows Fox to perform a Super Jump. No doubt there will be a plethora of power-ups like this one.

[Above] This scaly fellow looks like the sort of cad that could be a thorn in the side of our furry-faced hero!

[Above] Yikes! We've seen some ugly bleeders in our time, but this shocker must take the proverbial biscuit!

Kam

All the mighty-morphing power that you'll ever need!

Starring the fairy princess of the same name, *Kameo* sees you attempting to recover the six Elemental Ancestors from the Dark Troll King. His planet is inhabited by a bunch of decidedly ugly trolls. There's absolutely no way that Kameo can take them on by herself, but by adopting baby monsters and raising them, she can train them to help her on her quest. Kameo's unique ability allows her to morph into any of the creatures that she raises. Each one has a set of abilities, which will no doubt be essential at certain points in the game.

While Kameo is morphed, you can see her inside the monster-form that surrounds her, not unlike the exoskeleton cargo loaders in the film *Aliens*. It's a shame that this title looks so similar (at first glance) to *StarFox* – because of this, people are overlooking its potential. Believe us, this will be one to watch!

EO

Star Wars Rogue Leader: Rogue Squadron II

The force has never been more beautiful.

If any title has the power to open up Nintendo to a completely new market, it has to be this. Running at 60 frames per second with ship models that mirror those in the *Special Edition* films, *Rogue Leader* delivers what every *Star Wars* fan has ever dreamed of. In fact, rumour has

it that Lucas Arts asked Factor 5 to tone down the textures on the ships, so that it didn't look better than the actual films!

With 11 missions such as the Death Star trench run and the Battle of Hoth, and the ability to fly in an X-Wing, A-Wing, Y-Wing, B-Wing and a

Snow Speeder, this will be the ultimate *Star Wars* simulation for years to come.

These shots just don't do the game any justice. All we can say is, go and watch the *Special Edition* version of the trench run. Then pretend that you're controlling it. Ta-da!

[Above] If this game gets any more like the film it's based on, we'll be off to get the ridiculously overpriced popcorn and rusty sweet wrappers! Just look at it!

[Above] Getting caught up in the crossfire of the dozen-or-so dogfights going on overhead looks pretty amazing!

FEATURE

NBA Courtside 2002

Are you ready for the most realistic b-ball yet?

Be prepared! The graphics on this title will not immediately jump out and grab you. We're assuming that this is something that will be addressed over the next five months, but for now we would like to draw your attention to the insane amounts of attention to detail. As you can see from some of the shots, the face mapping creates frighteningly real-looking characters. The AI and detection system uses the full power of the hardware, so that graphical glitches are a thing of the past. The ball is completely reactive to its surroundings – it will even spin in the right direction if a shot gets blocked! Impressive!

NBA Courtside's real forté comes in the form of its animation. A dribble morphs into a jump or a pass seamlessly. There is no visible join, thanks to the hundreds of animation sequences that Left Field has implemented. The definitive basketball simulation? We think so.

[Above] Kobe Bryant's boat race in digital form: *The GameCube* shows off... again.

[Above] This isn't finished code, but it still looks pretty damn good to us!

[Above] All the players are pretty gosh-darn lifelike, we think you'll agree.

[Above] Slam dunk! That'll be two points to the Los Angeles Lakers then!

Eternal Darkness

The philosophical horror that'll see you losing your head!

We've been hyping this title ever since we first set our eyes upon it at E3 2000. It was a technical marvel on the N64, but now Silicon Knights has been able to recreate its original vision to the fullest.

The entire game runs at a constant 60 frames per second, even with up to 20 enemies on screen! The real-time cut-scenes look as detailed as any FMV that we've seen so far, and it all flows seamlessly with the action.

You won't believe this, but the loading times are – wait for it – faster than the N64 version! Silicon Knights has even had to slow the load times down, as they were too fast for people to handle.

We've gone into a lot more detail on this title in our in-depth preview – there's just too much to tell you. *Eternal Darkness* is due to be released in December in the US, and it's at the top of our most wanted list!

THE

Best of the Rest

As if the wonderful sights and sounds emanating from the Nintendo stand weren't enough, there were also a whole host of other developers and publishers to visit. Hey, this job isn't easy you know!

First up, we'll tell you about Sega's offerings. As we've been reporting in previous issues, Sega is gearing up to support the GameCube in a big way, and the three titles that it was showing at this year's show are just a taster of things to come. *Virtua Striker 3*, *Monkey Ball* and *Phantasy Star Online Version 2* are all coming our way. *Virtua Striker 3* is the standout title – the 30-second long video shows frustratingly little of the game. Despite that, it's all running in real-time and it looks fantastic. If Konami doesn't show *ISS* at Spaceworld in August, this will be one of the big titles at the Japanese launch. *Monkey Ball* is a cracking little game involving a monkey... and a ball! Erm, enough said, the shots explain the game far more successfully than we ever could. *Phantasy Star* looks identical to the Dreamcast version at the moment, however, this title is significant, as it confirms the existence of some sort of online plan for the GameCube.

The Electronic Arts stand was miles away from the Sega stand, so we were hoping that the trek would be worth it. As it turns out, there was only one GameCube title in the form of a very early version of *Madden 2002*. It was running right next to the Xbox version and the two games looked identical! There's nothing much to say about it really – it looks great, but underneath the graphics it's just *Madden* by numbers.

Our extensive search of the many halls of E3 revealed only two more stands that were willing to show us anything GameCube-related. They were the Kemco stand and the Acclaim stand. Kemco (responsible for the *Top Gear* series) was showing two videos. The first was *Batman: Dark Tomorrow* and the second was *Universal Studios*. We don't have many details at the moment as the two games are still very early and none of the material shown was in-game footage.

Acclaim showed a very brief video of *Turok 4: Evolution*. Set as a prequel to the other instalments, the video showed the true nature of the

designers' expectations for the game, including flying sections and levels bursting with lush scenery. After a lot of hassling (Acclaim US hate us for it unfortunately) we were taken into a side-room and shown a four-week old version of *Dave Mirra Max*. It looked easily as good as the PS2 version and ran at a constant 60 frames per second. All that after four weeks in development! We almost fainted there and then.

Sadly we can't fit any more details into this section, but make sure you check out the Showcase section for more on what wasn't at the show, and what we reckon will show up at Spaceworld 2001.

[Above] Phwoar! Look at the lighting effects on that. We know it's just a startup screen, but it bodes well for the rest of the game!

[Below] This kinda reminds us of *Sonic 2* and *3*, except far, far better, obviously!

[Below] Just look at the quality of the character animation in that screenshot, and then imagine it running at 60fps. PlayStation2? PlayStation Who, more like.

Ver. E3

GBA Takes All

32

[Above] Rare seems to have got to grips with the GBA. That has to be a good thing!

[Above] Diddy Kong Pilot looks like another Rare classic. We can't wait!

[Above] Check out the lighting effects on that screenshot! Yummy!

[Above] Once again, the level of detail on the GBA continues to astound us!

[Above] Quite how a picture of Roy's new house got on there we'll never know!

As we predicted last month, Game Boy Advance totally swamped E3. Every single console publisher had at least one title to show us. You could almost be forgiven for thinking that the GBA was indigenous to the US and that it had been at the top of the food chain for the best part of the last 500,000 years. It really did consume every last bit of floor space. Sadly there is no way that we can cover all of them – even a dedicated GBA magazine couldn't do that. For now, we've grabbed shots of all of the games that could be found on the Nintendo stand, as well as a few others that really stood out.

Having not announced anything for the GBA, it was a surprise to see Rare providing four playable titles. Two of these were to be expected – *Diddy Kong Pilot* and *Banjo Kazooie: Gruntilda's Revenge* are similar in concept to their N64 counterparts, but it's still a pleasant surprise to see that Rare has totally got to grips with the technology. Instead of the usual gang of cartoon critters, *Diddy Kong Pilot* offers a number of branches from the *Donkey Kong* family tree as well as some of the *Kremlings*.

The next title, *Coconut Crackers* is a simple tile-based puzzle game, padded out with a bunch of bonus games. The real surprise was *Sabrewulf: Rumble In The Jungle*. Everyone thought that this was going to be a GameCube title – we didn't think for a second that it would be heading for the GBA!

Significant titles from Nintendo came in the form of new versions of *Golden Sun*, *Magical Vacation* and *Mario Kart*. We've covered all three of these games before, but it was nice to see that the extra development time afforded to them is being put to good use. *Mario Kart* is due for

release right about now in Japan. Based on what we saw, expect record sales to follow.

As you can probably imagine, Sega was shouting extremely loudly about its GBA offerings. *Spyro the Dragon* made a surprisingly strong appearance. Presented in a similar vein to the PSOne version, the isometric platformer looks glorious. The graphics on the GBA seem to get better with every new title – more proof that the limits of the GBA will not be reached for some time yet. *Sonic* was also very impressive – everything that you would expect from the little guy has been implemented, and it could just be the best version yet. *Advanced Columns* is an update of the age-old *Tetris*-esque classic. Hey, every platform has to have one, right? Rumours were banded about concerning a GBA version of *Phantasy*

[Above] Hmm, this sounds like a fine upstanding establishment! Pint please!

[Above] After her success with dogs, Barbara Woodhouse trained misbehaved dragons.

Star, but there didn't appear to be one, and the Sega rep merely laughed at us when we mentioned it. Oh well.

As well as a very strong line-up from Capcom (*Street Fighter*, *Breath of Fire*, *Final Fight*) and Activision (*Bomberman Tournament*, *Mat Hoffman*, *Tony Hawk*), there were also surprise hits in the form of *Super Dodgeball Advance*, *Earthworm Jim* and, last but not least, *Fire Pro Wrestling*.

Phew, that'll probably do for this issue. Remember to check out the Showcase section for all the latest announcements! Ladies and gentlemen...E3 is over!

64 MAGAZINE RATING

64 MAGAZINE rates graphics, audio, gameplay and challenge out of five. What does it mean when a game gets a particular score?

Well above and beyond the call of duty – five in a category means it's damn near faultless!

A good job – there might be a few rough edges that could have been better, but nothing serious.

Average – a game that gets this score does its job adequately in this category, but isn't anything special.

Things aren't looking good – a mark of two means that this part of the game is definitely below par.

Complete rubbish – this part of the game has been done so badly, you wonder why they bothered!

THE FINAL SCORE

95%+

Every game gets a score out of 100 – but what does it actually mean? Ignore anything other mags may say – 64 MAGAZINE is the most brutally truthful N64 mag around, and if we give a game a good (or bad) mark, you can take that as the gospel truth. These are what the scores mean in English...

This score wins a game the coveted Gold Medal Award. Unlike some rags, which hand out top gongs like Smarties, we're very tight-fisted with this award – from the more than 200 N64 games reviewed, only an elite few have got the gold. It's your guarantee of a top game!

90%-94%

Welcome to Sizzler country! Scooping one of these awards means a game has had our brand of quality seared into its tender flesh. Unless you have a beef against the particular kind of game, anything that scores in this range can be bought without fear of crapness.

75%-89%

The good-but-not-awesome zone. A game in this range will still be worth getting if you like the sound of it, but it will either have some minor but annoying flaws or be missing the hard-to-define 'hook' that makes a truly great game.

50%-74%

Starting to drop into the realm of games that should only be bought if you're really, really into the subject. They might have flaws that spoil the gameplay, or be well done but not especially interesting. Be careful before you spend your money.

30%-49%

Warning, Will Robinson, warning! If a game can only manage a below-average score, then there's obviously something badly wrong with it and you should give it a wide berth. Don't say we didn't warn you.

10%-29%

You are now entering the World Of Crap. If a game ends up here, it's got so many things wrong with it that the Russians may be planning to use it as a space station. Do not, under any circumstances, buy anything that scores this low!

Below 10%

Can there really be anything this pathetic on the N64? Oh yes, there can. Oh yes.

Tony Hawk's Pro Skater 2

One skating game you definitely won't get 'board' with!

\$64,000 QUESTION

- Absolutely stunning graphics and animation
- Tons of moves to perfect
- Loads of cool courses
- Oh, it's just great!
- A little tricky when you first start playing.

Possibly the greatest thing about *Tony Hawk's Pro Skater 2* on the Game Boy Advance is that you can try to pull off all of those cool-looking moves without the fear of falling violently on your face or breaking your legs. However, this isn't the only reason why this portable piece of gaming heaven is one of the best titles yet for the GBA. No, the real reason is because of the beautiful graphics, simple-yet-addictive gameplay and damn fine controls.

Skate Or Die!

If you are a fan of any of the *Tony Hawk's* games on other systems, then you'll be amazed by the sheer

brilliance of this latest version. Despite the fact that the action is viewed from a different angle (it's now an isometric view and not third-person) the game looks and plays just like any other incarnation. You can pull off all of the familiar moves very easily and putting them all together is no problem at all, even though there aren't as many buttons to fiddle with. *Tony Hawk's Pro Skater 2* is amazingly addictive and incredibly simple to get into. Fine, you may struggle at the beginning but a few tutorials will soon sort that out. The sound is possibly the only real weak spot, but this is mainly due to the tiny speakers that dog every Game Boy system. Everything else, however, is near flawless and it all combines to form a game which is a definite 'must have' for any self-respecting GBA owner. Consider yourself told! ■

"Beautiful graphics, simply addictive gameplay and damn fine controls!"

[Above] This skater's got so much air, he's actually heading into orbit!

[Above] Tony suddenly realised something: he had tied his shoelaces together.

[Above] "There ain't nothing wrong, with a little bit of bump and grind!"

2nd Opinion

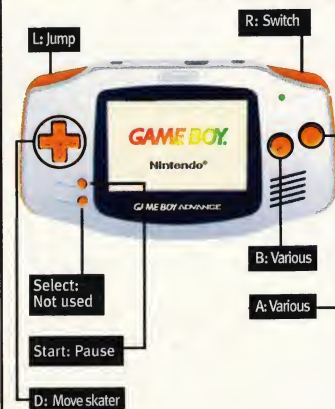

→ I have to say I was pretty blown away by this game – it's fantastic! Graphically it's outstanding, and it's no slouch in the gameplay department either! If you were a fan of *Tony Hawk* on the N64 then you certainly don't want to miss out on this version.

\$64,000 QUESTION

- Looks fantastic
- Sounds great
- Rather complex moves
- Hard on your fingers!

In general, videogame boxing aficionados have divided opinions on the previous *Ready 2 Rumble* games on other formats. Some consider them fantastic fun, others find them too arcadey.

Ready 2 Rumble: Round 2 on the Game Boy Advance is essentially (according to Midway at least) the PlayStation2 version of the game, crammed onto an itty-bitty cart. While this seems like quite a claim, it's an indisputable fact that – graphically at least – the game does, superficially anyway, bear a striking similarity to the PS2 incarnation.

You have a choice of several different boxers, almost as many as on the PS2, with only two of the bonus fighters missing (Bill and Hillary Clinton, in case you were wondering) and all the training

modes from the original version are here for you to tinker with too.

Watch Us Wreck The Mic!

The object of the game (in case you didn't know) is to pick a boxer and train them up until they're the top of their field. You do this through various types of exercise, feeding them the right vitamins and supplements, and – of course – by fighting other boxers.

Ready 2 Rumble Round 2 is a great attempt at a boxing game and it does have a lot to it, however, the number of different move combinations may be a bit much for the casual gamer. Plus, we found that the need to hammer the A, B, L and R buttons repeatedly did get quite painful after a while. Doubtless fans of the *Ready 2 Rumble* series will love it though, and thankfully there's not a PJ or a Duncan in sight! ■

"Thankfully there's not a PJ or a Duncan in sight!"

[Left] The angrier your boxer gets, the more Rumble he builds up.

[Above] Ooofyah! That smarts! The lad in the green treds is getting a bit of a pasting.

[Above] It's a robot with a punchbag for a head! You can take him out, champ – just use that handy can of WD40!

2nd Opinion

Rating

★★★★☆

→ Having been a fan of the *Ready 2 Rumble* series on other platforms for some time, I was looking forward to this, and it didn't disappoint. If you fancy a GBA beat-'em-up that doesn't take itself too seriously, you should consider getting this slugfest!

\$64,000 QUESTION

- How many times? This game looks amazing!
- Loads to do, and never less than fun.
- Gets a bit difficult towards the end...
- No secret castle? Boooo! No fair!

Dracula's a persistent chap, isn't he? No matter how many times he's put back into his grave, he always manages to come back again. In this – the umpteenth *Castlevania* game – it's the job of Nathan Graves (trainee vampire hunter and all-round good looking) to send ol' Vlad back where he belongs once again... until the next time, of course.

I Want To Bite Your Finger

Circle Of The Moon goes the way of the PlayStation game *Castlevania: Symphony Of The Night* by having just the one absolutely huge level to play through, rather than lots of short ones. Mind you, that doesn't mean it's over in a flash – exploring the

entire castle will take you ages! You need to find your way around and collect all manner of magical items to access every nook and cranny... oh, and there are some rather nasty (and really massive) boss monsters to take care of too!

Despite being on a handheld, the visuals and music in the game really astound – they create just the right mood for a game about vampires and other nasty stuff.

These combined with the action-packed pace of the adventure manage to create a game that'll keep you going for ages and just when you think it's over... well, the game is only just beginning. This game is excellent to the extreme! ■

"There are some rather nasty (and really massive) boss monsters to take care of!"

[Above] All was going well, until some massive text hit our hero on the head.

[Above] Spooky! Now Nathan's under attack from giant, er, numbers...

[Above] Hiiiya! Our man tries out his 'argument settler' on a nearby pillar.

2nd Opinion

→ I've never really been a fan of the *Castlevania* titles, and this is still a flaming tricky game, but the atmosphere on this little handheld number alone would knock the socks off even the most hardened Game Boy Advance sceptic.

\$64,000 QUESTION

- Frantically addictive multiplayer action
- Puzzle mode will keep you going for a while
- Control method is a pain in the bum
- Not as much fun playing it on your own...

It's not often you can say that a game which was originally on an all-powerful console just one year ago has been converted over to a handheld almost perfectly. Not surprisingly though, that's exactly what you can say about *Chu Chu Rocket!* on Game Boy Advance!

Think it all looks a bit confusing for a puzzle game? Well, don't worry if you don't know your Chu Chus from your Capu Capus – the concept is easy to grasp. The aim is to guide the blue and white mice (known as Chu Chus) into your coloured rocket by means of the arrows – Chu Chus only run in one direction, so you need to divert them by placing an arrow in their path to get them going where you want them. Of course, you have to avoid any traps along the way... as well as those dreaded orange Capu Capus (or cats, if you want to be picky about it).

Rocket In Your Pocket

There are so many modes in the GBA version of *Chu Chu Rocket!* that it's hard to decide where to start. If you're a lone puzzler, you might fancy the Puzzle mode where dropping arrows in the right place is essential, whereas those of you with friends

can have a go at the madcap Battle mode, where it's every man for himself. Then there's the Challenge mode which involves hitting target scores and even the chance to create your own levels if you're that way inclined. It's all a bit daunting really!

This game was fantastic on the Dreamcast – probably even helping to sell the console itself – and it looks set to do the same for the GBA. Check it out, you'll regret it for years to come if you don't! ■

[Above] The solution of Hampton Court Maze was leaked to the press by a gardener.

[Above] As you can see, *Chu Chu Rocket!* is no oil painting. It's still great fun though!

[Above] Deary me, that tablecloth could do with a bit of a clean... oh, I think that might be the gaming area after all.

Excitebike

Engines, dirt, mudflaps...what more do you need?

Dirt-bike games across all formats have always shown promise at first... until that is, you actually get to play them. Nobody has previously managed to capture the feel of tearing across jump-filled, rut-infested dirt tracks at 60mph on a bike that can out-accelerate a Porsche... until *Excitebike 64* that is. At last, the true feeling of this exhilarating sport has been transferred to the videogame arena with style, grace and healthy doses of the big air, tight racing and frightening speed that motocross is known for. Nintendo may have taken its time in delivering *Excitebike 64* to European shores but never has a wait been more worth it!

So what's it all about? Well, for starters, motocross fans can forget about playing as their daredevil heroes and petrol-heads will be disappointed that the bikes aren't based on the real models. The only thing that even hints of officialdom is the odd logo from companies like

Scott, who make motocross clothing and goggles. So without the periphery aspects that other developers use to sell often second-rate games, developer Left Field has had to actually come up with a game that relies on gameplay to sell it.

Burnin' Rubber

Excitebike 64 has you hooked from the very first corner but its not until you learn the control nuances that the game really comes into its own. The control system itself is fairly simple with buttons for accelerate, brake, turbo and slide. On top of this you have the trick controls, but *Excitebike 64* is best played as a pure racer. To begin with, you inevitably find yourself trailing the pack and hitting the deck with annoying regularity. The idea isn't simply to go as fast as you can on the straights and take the corners as smoothly as possible because motocross tracks aren't the flat smooth places that most racing game fans are probably used to.

You're constantly up against jumps, ruts, bumps, hills, burns and bomb-holes of hugely varying sizes and intensity. To get through all the obstacles that the tracks throw at you and still keep your speed up, you need to make deft use of the turbo button (which acts and sounds like the power-bands on a scrambler). If you don't apply this extra burst of power at just the right moment, you land incorrectly and lose your momentum, only to watch the pack go sailing past you. After grasping how to ride your dirt-bike to a certain degree of proficiency you can then really start to race the AI-controlled opponents, which is where the fun *really* begins.

Down And Dirty

A motocross start is one of the most nerve-racking moments in motorsport and *Excitebike 64* portrays it to perfection. The race to the first corner for the 'holeshot' is tense and exciting and the feeling doesn't let up for the rest of the race. Your opponents try every trick in the book to block or get past you, and you have to be doing the same with them. Every corner is a challenge,

every jump a nightmare when you're in the pack, but when you come out of the thick of it in first place, the feeling is pure satisfaction. And that's just on the easier modes. Once you get up to the Pro difficulty level you find the racing even tougher. But after practicing until you're good

"At last, the true feeling of this exhilarating sport has been transferred to the videogame arena"

[Above] Either the engine on that bike is about to give up the ghost, or the rider's lunchtime triple egg sandwich is starting to fight back...

enough to really mix it with the big boys, you gain even more enjoyment and satisfaction from the action.

Riding a motocross bike is a particularly terrifying experience and the Left Field staff have obviously ridden a few in their time, because *Excitebike 64* is brimming with realism. They've got the cornering down to a tee – whether it's long sweeping bends, tight horseshoe corners or steep burns. Even more authentic than the cornering though, is the way in which your bike and rider handle the undulating terrain and truly stupefying jumps. It has to be said that this only looks great when you get it just right, but then that's real incentive to keep getting better and better, isn't it? In short,

Do It Yourself!

Excitebike 64 has eighteen brilliantly designed racing tracks. It will take a long time to learn every corner, jump, rut and obstacle on each course and it's only then that you can really start to push the envelope and race to win in the Pro difficulty mode. However, it doesn't stop after you've learned everything as Left Field has thoughtfully included a track editor in the game. So when you've mastered everything the game has to offer, you can then start to build your own courses, which gives the game an almost infinite lifespan!

42

Back To School

To really get the most out of this title you need to learn how to get the best from the bikes. The easiest way to accomplish this is to use the tutorial option which explains clearly how to handle the machines from the absolute basics right up to the flashy stunts.

Lesson 3a Press START

Lesson 4a

Lesson 4a

[Above] Our man's reluctance to get rid of the stabilisers on his bike cost him dearly during the race.

Left Field has created easily the most realistic and enjoyable motorbike physics engine ever. Doubtless PC fans will have something to say about that but we've never seen the kind of fluidity that can be achieved over the rough terrain in *Excitebike 64* in any other game.

Rev It Up!

All this realism would be useless however, without the other key factor that makes *Excitebike 64* such a great playing experience – the tracks. These are the most authentic we've ever seen on a dirt-bike game. The outside motocross tracks are long, hill-strewn affairs with rough jumps and natural obstacles to avoid. The corners vary between sweeping curves and tight angles, while the jumps are often three-pronged affairs in that you might hit two on the way up a hill before you actually reach the main death-defying leap. These outside courses often prove faster than the more technical stadium-based supercross circuits where tight jumps,

wrist-breaking sequences of bumps and sharp corners are the order of the day. It's in the stadiums though that your technical ability is really tested. You have to traverse masses of bumps and ruts and time your jumping to perfection, because – more often than not – the landing leads directly onto a corner. Supercross may be slower and tighter, but like motocross, the tracks are plenty wide enough to make overtaking possible.

Off-Road

Left Field hasn't stopped at creating the best racing tracks ever seen though – there is also a whole load of extras to be unlocked. Only two are open at the start – the stunt track and the desert race. The stunt track is stadium-based and is just a free-ride area filled with jumps, ramps and kickers. It's here that you can perform a limited but exciting array of tricks,

[Above] The Pizza Delivery Grand Prix was a bit of a flop with the fans, but the race took more than half an hour, so they claimed their money back.

"Motocross fan or not, you really have to have Excitebike 64. Period."

In My Day...

There are loads of hidden extras in *Excitebike 64* – the original NES version of the very first *Excitebike*! It's well worth unlocking this, as it's an action-packedz retro blast from the past. Is that cool, or what?

which are accomplished using combinations of the stick and the Camera buttons – this is fiddly, but fun nonetheless.

The desert race is more instantly rewarding and takes the form of a point-to-point sprint with no track boundaries. The challenge here is negotiating the huge sand dunes while keeping your speed up and not overheating your engine. It's superb fun and playable over and over again as there's no actual track and the course randomly generates each time. Other extras include a multi-player soccer game and the original 2D *Excitebike* game, all of which will keep you playing for an age.

We've purposely avoided telling you about the graphics so far because *Excitebike 64* is one of those rare entities in gaming today – a gameplay-led title. Which is lucky because the graphics are nothing to write home about. Even the Expansion Pack doesn't add much to the visual side, but as you are generally concentrating on controlling your scrambler and thus not looking at the scenery it really doesn't matter. Having said this though, the tracks themselves are all drawn extremely well and – more to the point –

[Above] Realising that he was about to lose, Copperfield decided to cheekily levitate all the other racers. Get out of that!

designed authentically. It's just that the whole thing seems to have a rugged, unpolished look about it.

Out Of Sight!

There are a few niggling problems within the game itself. Firstly, it can be very frustrating, especially in Season mode. Here you have to place first overall but at times the odds seem unfairly stacked against you. If you don't score well in the first few races you find yourself restarting the whole season which can become extremely time consuming. However, once you've truly mastered the controls, you're able to give as good as you get and fight it out in every round. Another problem is that, like many other Nintendo racers, when you can't see your competitors, they seem to have a mind of their own. This basically comes down to the fact that if you get the 'holeshot' and a good first lap, you encounter back markers by the second lap. However, make a few mistakes on lap one and you won't see any back markers for the entire race. This is obviously built in to make it more exciting when you're leading, but it's basically redundant.

The few problems that arise with *Excitebike 64* are outweighed ten times over by just how much fun it is to play. The tracks are stunning and the physics engine manages to feel realistic, but also work perfectly as a game. Not only this, *Excitebike 64* comes complete with its own track editor, meaning that you'll probably still be playing it for years to come! It really is the first truly playable, ultra-addictive motorbike game. It's also one of the last great N64 titles, so motocross fan or not, you really have to have *Excitebike 64*. Period. ■

[Below] When one of his death-defying tricks went wrong, stuntman Evel Knievel would often take out his fury on his bike.

- Challenging tracks with some ingenious jumps and obstacles.
- Just as good as *Mario Kart*, only out now not in a few months time!
- We don't know some of the characters very well over here.
- The computer-controlled characters seem to always come off better in a battle!

Konami has pulled a fast one on Nintendo by creating a fantastic *Mario Kart*-style game, and releasing it for the Game Boy Advance before Nintendo can release *Mario Kart Advance*! Originally called *Wai Wai Racing* in Japan, *Konami Krazy Racers* has eight characters to choose from. They are all stars of previous Konami games like Dracula from *Castlevania*, the Ninja from the *Mystical Ninja* games and stars of *Parodius*, *Gradius* and *Pop'n Music* – and they all turn out to be pretty mean karters too!

Choose from four game modes with Grand Prix, Time Attack, Free Run and Mini-Battle on offer and you can race these great mini-karts through 16 game-based courses. There's the tricky Pop 'n' Beach with sandy shores to rip through and water hazards, Skybridge has you hopping among the clouds with some death-defying leaps to make and Ice Paradise sees the karts slip-sliding away!

I Have The Power!

With power-ups galore like lightning, moles to leave holes in the track and turbos (plus some great presentation), *Konami Krazy Racers* is the perfect alternative to Nintendo's own karting game. There's even a hidden level you can unlock if you're a really hot karter – and it's rumoured to be based on the *Metal Gear Solid* games! Cool!

The racing is fast and furious with a real challenge from the computer-controlled competitors and loads of fun. This is the game to pick up if you like an action-packed racing game with a twist of fun. ■

[Above] As you can see, this is pretty similar to *Mario Kart*. Can't be a bad thing!

'Konami Krazy Racers is the perfect alternative to Nintendo's own karting game!'

[Above] The first Grand Prix to be held on the moon lacked spectators.

→ I absolutely loved this game. Not only is it certifiably the most addictive game we've played in ages, but it's also very rewarding with it. Who'd have thought that a game in which the central character looks like a cocktail stick could be any good?

→ Paul Gannon

Kuru Kuru Kururin

Who'd have thought that playing with a stick could be so much fun?

Who would you call to save the world? Superman? The Ghostbusters? The Men In Black? Or would you call a small duck in aviator goggles who pilots a flying stick? What do you mean you'd probably call Superman...?

Kuru Kuru Kururin, besides being one of the most weirdly-named videogames ever, is an entirely new title for the Game Boy Advance. The object of the game is... obscure, to say the least. The idea is to guide a constantly rotating stick around successive stages made up of narrow canyons and corridors, at all times avoiding any contact with the walls, and rescuing little animals along the way. Hit a wall and you

lose one of three lives, lose all three and the stick disintegrates, so it's back to the start of the level.

Stick It To Me!

As you progress through the game, the levels get more complicated and more elements are introduced, like springs which reverse the direction of the stick's rotation and a range of different hazards.

On the face of it, Kuru Kuru Kururin is a totally daft idea for a game. In execution, it's one of the most – if not the most – addictive games of all time. The original Game Boy had Tetris, the Game Boy Advance has got Kuru Kuru Kururin! Buy it today! You owe it to yourself and your friends! ■

[Above] Night falls on Pinobee's magical homeland. Hope he's not scared of the dark!

[Above] Pinobee's new milk churn made his day job as a dairy farmer much easier.

One of the first Game Boy Advance games available in playable form, *Pinobee* was one of the attractions at last year's ECTS show, where it impressed everyone with its amazingly colourful graphics and top-notch action.

There seems to be a lot that's original and clever about this title, but it doesn't come across particularly well. You play the little fellow, Pinobee, out to save his bug mates and fill his chest with the desired organ, and the 'jump-jump' style of flying is a new one to us. Press jump and Pinobee leaps into the air, zooming upwards in a

superhero kind of way. Press jump again and he takes an extra boost, meaning he can reach platforms other characters can only dream of!

What with being able to climb walls and bash everything that moves *Sonic*-style, there's a lot to explore in this vast game, and the cleverest thing is the way the story unfolds depending on how you complete each passing level.

You're Pollen My Leg!

After every stage, Pinobee fills in his diary. If you missed a crucial point, you still complete the game, but only in one possible way out of many. This is an ultra cool idea and should keep you coming back for more, to see if you can manage to unlock all the secrets you missed first time around.

The best way to describe *Pinobee* is 'unique'. The game has many elements of a traditional platform game, but they have been executed in an exciting, new and original style. Go on... give it a whirl! ■

→ IWell, having played this I have to say I didn't think it as good as the games it's inspired by. There's a bit of *Sonic* here, a bit of *Rayman* there, but *Pinobee* isn't as good as either of those games. Good in the short term though, so you should check it out.

- Absolutely fantastic, colourful visuals
- A decent challenge
- Ingenious level design
- Can get a bit frustrating after a while

It's a long time now since Rayman made his debut on the Game Boy Color and reviewers raved about the miniaturised adventures of the floppy-eared freak! It's a bit strange to look back and see the reviews claiming "PlayStation-style graphics" – now we've really got 32-bit graphics, and they're definitely a sight for sore eyes!

Running through the unchanging backstory of Rayman's adventures is a silly but unavoidable chore, so here goes... Mr Dark has destroyed the harmony of the world by stealing the Great Protoon, and defeating its protector, Betilla the Fairy. The Electroons, who used to gravitate peacefully around this nucleus, have been captured and imprisoned, and there's no-one else out there prepared to battle through 62 levels of topsy-turvy platform action apart from trusty old Rayman. So he's back, with his spinning ears, his shooting glove and a total lack of any form of bodily support.

These psychedelic adventures are a real eye-candy feast. Okay, so fans may be a little disappointed that this isn't a NEW adventure, but the

"These psychedelic adventures are a real eye-candy feast!"

[Above] David Attenborough would crap himself if he saw that in the wild!

➔ Tricky though it may be, *Rayman Advance* is a riot of animation, colour and humour from start to finish. There are so many things going on on the screen that it's hard to see how this much detail was squeezed onto the GBA. Overall, a really enjoyable game.

➔ Alex Jones

graphical detail throughout makes this a new watershed in handheld game design. For instance, when you let the little Toons out of their cage, they cheer and wander around the landscape for ages, kissing each other, snoozing in corners and dancing. It's impossible not to grin as you watch the weird antics of all the little characters.

Double Dutch

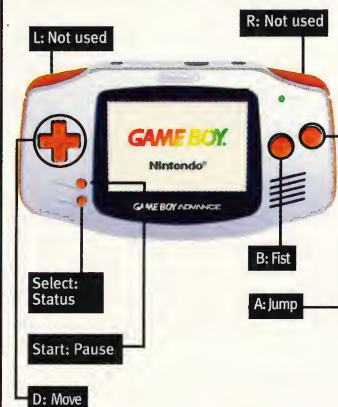

Sadly, there are always bad points. Whoever thought it would be a good idea to have an entire level following Rayman (via spotlight) through a pitch black cavern when it's difficult to see the full GBA screen at the best of times deserves a kick. In fact, *Rayman Advance* is unbelievably hard throughout, and no amount of save stations will stop you wanting to rip off all your skin in anguish at times. Oh well, you're bound to know someone who completed the original game on one of the older consoles, and there are loads of handy little hidden cheats to help you too. Take a look once again at the shots – it's all worth it! *Rayman Advance* is a top game, so be patient! ■

All the fun of a party without the clearing up afterwards!

This is going to be a tough one. How to write a four page review about a game which, despite having a few minor improvements, is basically the same as its two predecessors? Without trying to repeat ourselves or stretching out the new information for as long as we can, we'll endeavour to craft an in-depth critique of *Mario Party 3*. Although

"It's nice to know that Mario Party and its sequels are still the leaders of the pack"

why we should bother trying to write an in-depth and intelligent critique for the first time ever escapes us, so let's not bother.

Mario Party 3 is like *Mario Party 2* and *Mario Party* in nearly every way. We say nearly because, in fairness, there are a few improvements in this third outing that deserve to be noted.

The games all involve you and three other players – CPU-controlled or friends – moving around a themed board playing games and collecting coins and stars. Both previous *Mario Party* games had a theme and this one is no different. The Millennium Star falls out of the sky and, erm, well, for some reason this means Mario and his pals have

- Gameplay isn't as much of a drag this time!
- Great excuse to find some friends... finally!
- Dual Map mode offers a nice change!
- Some sections can still be boring.
- Only worth buying if you don't own the first two games.
- If you can't find any friends, the game isn't as good!

These Are A Few Of Our Favourite Things!

There are, as we've said already, 70 brand new games in *Mario Party 3*. Some are good, some bad, some plain stupid, but from the good ones, we've chosen these four examples:

QUIZ
 This game requires you to answer questions based upon the rules and actions in the main game itself. There are question about your own scores, your opponent's scores and the events that have already been completed... so keep your eyes open!

FIRE
 A bit like something out of *Point Blank* but not quite. Well, obviously there's no light gun or anything but you still have to have very quick reflexes to make sure that you hit as many correct targets as your opponent, if not more. Bang, bang!

TUBE
 Remember that game, ooh, what's it called again? That's right, *STUN Runner*. Well this mini-game is a bit like that, only shorter. It's fast, fun and a little bit too tricky, but it's darn good and that's all that really matters!

JUMP
 This game puts Mario back where he belongs, jumping from platform to platform, climbing ever higher to reach the goal! It's tougher then you think too! The platforms move, the jumping is tricky and it takes a fair bit of practice to master!

Above: It was a close one, but it was obvious from the photo finish that Yoshi was the clear winner. For his horse, riches and fame await, for the other mounts: a job ferrying fat children around on Blackpool beach...

to roam around and play with each other. Wait, we'll rephrase that! Ah, forget it, you know what we mean! (Careful Paul! - Roy.)

Party Line

We now know, graphically, what to expect from the *Mario Party* series. There are lots of lovely environments to explore and each of the characters is depicted in the traditional, cutesy style we have all come to recognise. On top of all these sugary, syrupy images, Nintendo has thrown in some nice new visual effects. It's nothing but cosmetic fluff to make this game look better than the last, but it's still rather cool to be subjected to loads of flashing, sparkling special effects to cover up the fact that the content isn't

really anything new.

Again, the sound effects and pieces of music are pleasant but not exactly mind-blowing. This game could just as easily be played with the sound off and you wouldn't lose any of the gaming experience.

In a nutshell, *Mario Party 3* is more accessible and features a collection of games which are cleverly created and bulging with more fun! If that is not good enough, the game also has 70 - count them, 70 - brand spanking, straight off the press, fresh as the morning milk, new as a newborn baby, minigames to play!

Party Pooper Scooper

The main strength of *Mario Party* has always been the imaginative minigames that are littered throughout. Although they were always fun, an awful lot of them

It's My Party and I'll Cry If I Want To!

Mario's party is by no means the most famous party in the world. Why, that would be a ridiculous thing to think! But that then begs the question, "What is the most famous party in the world?" Here are our findings:

PARTY OF FIVE

That TV show that launched the careers of Neve Campbell of *Scream* fame and that other one, the one who was in *I Don't Care What You Did Last Summer*. Considering the show was called *Party Of Five*, there seemed to be far too many people in it!

Party Grade 4/10

BACHELOR PARTY

Not only is this a fairly humiliating event for all those involved in the pre-marriage ritual, but it also a film featuring Tom Hanks and that guy from *Grease 2*. This is not the kind of film you'd want to let kiddiewinks see, otherwise you'll hear the following question from them. "Dad, why is Tom Hanks running around after naked women while a donkey sniffs white powdery stuff?"

Party Grade 7/10

NOEL'S HOUSE PARTY

...was possibly the most notorious party in the UK at one point. Now though, the world of Crinkley Bottom has disappeared. To describe it now, it would seem as though it had been invented by a drug-addled mind. Par l'exemple: Little man owns a big, gunge-filled house. His flatmate is a large pink blob who attacks everyone. Little man hides secret camera in people's houses and embarrasses celebrities! Everyone in the surrounding village seems to hate the man. Comedy ensues. Hey, that's the early Nineties for you!

Party Grade 9/10

FANCY DRESS PARTY

Rubbish! They are nowhere near as good as you think they should be. Despite the efforts of most people who attend, the whole event comes across like a Dr Who convention at a hostel. The worst offenders of all are those fancy dress parties that have a theme everyone must stick to. For instance, a 'come as a dead person' party. Anyone who turns up as Princess Diana or Mother Teresa is booed back home. Or even worse than that, a 'come as a movie character' party. This is guaranteed to see people desperately try to dress up like a *Reservoir Dog*, Princess Leia or Bruce Willis from *The Fifth Element* in the mistaken belief that it will improve their pulling chances!

Party Grade 1/10

WINNER: Noel's House Party!

Who'd have thought it? Guess the BBC was wrong to pull it from the TV schedules, eh? (No!)

chiefly concerned hammering away at a button until your vision blurred. In *Mario Party 2* the challenges were a little more inventive, but a bit more convoluted as a result. This time the balance between challenging your brain and testing your reflexes to the limit is just right.

Some of the games are particularly cool. There is a rather interesting golfing game (Mario certainly enjoys his sports) that requires you to hit your ball as close to the hole as possible in order to win. Another rather manic game is styled closely on *Tetris* and is exciting, fun and colourful. One other game that made a big impression involves swimming away from a giant fish. Although you must bash your little B button to get away quickly, things are made even more thrilling when you discover that your character must dive under the

water to avoid being blown up by mines as well!

All of the games test a whole range of the player's abilities from skill, through strategy to using your memory to answer questions about the game itself. The overall package is far more rounded than in *Mario Party 2* and because of this, the game is incredibly satisfying!

Private Party

As for the main bulk of the gameplay... well it goes without saying that playing this title in party mode in single player is a bit pointless. Oh, sure, you can get used to the minigames and train your skills, but the problem with playing it on your own is that it can get a little dull at times. Single player mode means having to sit and watch the actions of the computer players as

[Above] Yes, this is a party game alright. Look at all those primary colours. Ouch. My eyes hurt!

Mario's most satisfying party so far!

they hop, skip and jump around the board. It also means having to watch them play their own individual minigames. After a while this does get a little tiresome! No, little polygon-perplexed friends, the only way to get the desired fun from this game is to get your friends involved! Surely the point of a Mario Party game, and we are only guessing here, we could be wrong, is to have your four friends playing along with you so that the overall experience is (counts on fingers) four times as enjoyable?

There is a second way to play Mario Party however... oh yes!

If you don't have three friends to make up the numbers at your party, you can actually play a new game which is just as enjoyable on your own or with one extra friend. The Dual Map requires a little bit more

strategy than the main game. It basically goes like this: you travel across the board, playing mini-games, collecting coins and other objects. On this journey you are accompanied by a partner (or two). These partners are there to battle against your opponent's partners and the ultimate aim of the game to ensure that you knock out all of the opposition without losing your own team. Okay, it's a little more complicated than that but you get the gist of it! At first the game is bemusing but once you have mastered the rules, it's actually surprisingly enjoyable!

Mario's Balls

Mario Party 3 is clearly the best incarnation of the series so far, and if you've resisted buying one of these games in the past, then now is your time to invest. Although there have been a few improvements (you don't have to pay anymore to play the opened mini-games, for example) Mario Party 3 still has its familiar faults, but these shouldn't be enough to put you off buying the game. With party games popping up on other - inferior - consoles, it's nice to know that Mario Party and its sequels are still the leaders of the pack. As the sun sets on the N64, and Mario and the gang move on to bigger and better things, you'd be doing yourself no harm in picking up this last Mario adventure for your favourite 64-bit beauty. ■

- Link-up action allows you to pummel your mates in comfort.
- There's some great options and personalised features
- The graphics aren't what you'd really expect from the GBA
- Controls are a bit tricky

Time for a real honest-to-goodness classic piece of slap and cripple. The Japanese wrestling series *Fire Pro* seems obscure next to big names like *Ready 2 Rumble* or *WWF Smackdown*, but they really were the pioneering wrestling videogames. In this first foray into GBA territory, 3DO has reverted to 2D action, using the space on the cart that could have been filled up with lacklustre 3D design to give the player hours of endless link-up fun, and some really mind-blowing extras

Big Sweaty Men

Over 200 ready-made wrestlers versed in jujitsu, kick-boxing, luchador (What? – Roy) and many other wrestling styles appear on this minuscule cartridge. You won't have heard of any of the fighters, not being Japanese and all, but that won't stop you getting hooked on their showmanship and scrapping skills. The graphics owe a lot to the SNES *Fire Pro* titles, but that's not

important. In fact, it still means that they're lifelike and boast highly complex animation. Which is nice.

This title's real bonus is the create-a-wrestler feature, in which you can customise every detail of your wrestler's look, perfect his move set and align him with one of the game's factions, making him a showman, a dirty fighter or whatever you desire. Combined with the four-player link-up option, this means that you and three mates can create fighters to resemble yourselves, and then pummel the living eyeballs out of each other from the comfort of your own dungeon. There's just so much in this game, we can't fit it all onto one page. Forget flashy rendered graphics – this is a bargain at 35 quid, and will mean you won't have to buy another fighting game for a long time. ■

[Above] Here we see the wrestler on the left throwing his opponent off-guard by morris dancing at him.

2nd Opinion

Rating

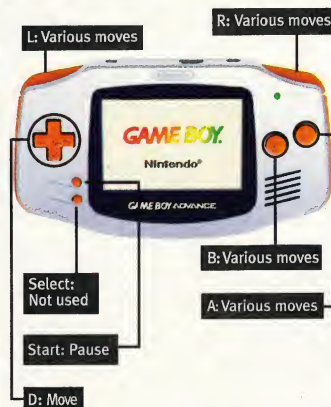

→ Not being a massive fan of all that WWF nonsense, my hopes weren't high for this 2D GBA grappler. I have to say it's quite a good laugh though, with loads of decent options to play about with. On the whole, *Fire Pro Wrestling*'s a decent little game.

through bends. The only downside to this is that, thanks to the way the courses are designed, it is sometimes hard to determine where these corners are.

The game looks really cool. Each of the cars have been carefully recreated from the ton of Japanese models available, and all of the tracks have been designed to test your digital dexterity to its fullest! *Advance GTA* is also very fast indeed, sometimes it feels so fast that as you approach a corner, you may find yourself grabbing your seat just to hang on! All right, maybe that's an exaggeration, but you get the point!

Admittedly, both games are a bit too similar and which title you pick largely depends upon your personal preference. The style of racing is different and the optional extras vary but by and large *Advance GTA* simply offers a different gaming experience. It isn't perfect by any means as the graphics can be a little jerky and it also contains a very annoying collision element, but for a game that doesn't offer that many extras (comparatively speaking) you still get a fair bit of quality speed freak action for your money. ■

[Above] Hmm, look at that lovely shiny new Honda. Vroom vroom, crunch etc.

Bomberman Tournament

One of the most addictive games ever explodes onto the Game Boy Advance!

\$64,000 QUESTION

- Amazingly addictive multiplayer modes
- Four players from just the one cartridge
- Decent one-player mode too
- What's not to like?

[Below] Being hit in the face by a wall of fire can really ruin your day.

[Above] That's right, incinerate your friend! Watch him burn!

It's fair to say that when we at 64 MAGAZINE heard of a *Bomberman* game being developed for the Game Boy Advance – well, we got more than a little excited. The little guy with the propensity for blowing things up has been around for quite a while and – with the odd exception – has starred in a number of fantastically addictive games!

Bomberman Tournament, fans of the game will be pleased to hear – has obviously been developed by someone who knows what people want from the game – and it's fantastic! Even better is the fact that not only does this title have the madcap multiplayer action that we've come to expect from *Bomberman*, but it also manages to produce the first decent RPG adventure game starring the little guy too! How, you ask? Well, you'd better read on...

Bomberman Tournament is worth the price of the console, all on its own. There's the multiplayer battle

mode (which we'll come to in a moment) and there's the single-player story mode. Story mode will look vaguely familiar to Game Boy Color owners. It's basically a cross between *Zelda* and the *Pokémon* games!

Explosive!

The story starts with Bomberman crash-landing his... er, Bombership, in a little village in a very *Zelda*-esque forest. The gameplay involves wandering the landscape, helping certain people out by finding stuff they've lost, battling others, and trading with everyone else. Battles come in one of two different forms – either with a familiar 'blowing stuff up' deathmatch affair, or with some very *Pokémon*-style turn-based combat using small creatures you find on your travels.

Battle Mode is a fantastic homage to past *Bomberman* games, with up to four players battling it out in an arena. You can choose from a range of levels, each with their own unique hazards (conveyors, pitfalls and suchlike) and a variety of power-ups ensures that the gameplay never gets boring. Like *Mario Advance* or *F-Zero*, this is another title that allows you to play four-player link-up battle with just the one cart –

God bless you Activision!

If you never buy another title for your Game Boy Advance, then at least get this one! ■

"It's worth the cost of the console, all on its own!"

2nd Opinion

Rating

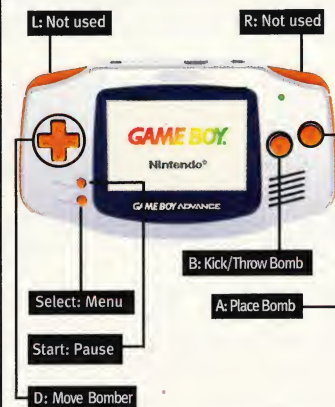

→ I used to think *Bomberman* was a bit overrated back in the old SNES days. With the benefit of hindsight, though, I have seen the light. *Bomberman Tournament* is worth the price of the console on its own! A refresh it may be, but a fantastically playable one. Get it!

\$64,000 QUESTION

- Manic wartime blasting action
- Quite a challenge, especially on the later levels
- Graphics and sound are quite dated
- Blasting can get a bit samey after a while

"1942 has the important GBC ingredient – that being gameplay – in spades"

[Below] The graphics for the Game Boy Color version aren't quite as good as in the arcade, but the gameplay's just the same!

Hollywood would have us believe that wars involving the American military are easily-won affairs, featuring lots of soldiers who look like extras from *Dawson's Creek*, and hordes of computer-generated enemies that were added in afterwards. Of course, war isn't that easy at all. In fact, wars are horrible things. Thankfully, Capcom has taken the brutality, violence and needless death of Second World War dogfights, and turned them into a cracking shoot-'em-up for the Game Boy Color! Hurrah!

Bogey

In this port of the prehistoric arcade original from Capcom, you (or you and a friend in two-player mode) must fly your fighter plane deep behind enemy lines, destroying wave after wave of the opposition's aircraft and trying very hard not to think: 'This is just *Centipede* with improved graphics!' You'll be staggered to learn that there are – gasp! – power-

ups to collect, and – cor blimey! – big bosses to defeat. Don't despair though, because 1942 has the important GBC ingredient – that being gameplay – in spades. Right

from the off, you're plunged into a top-down, vertically-scrolling dogfight straight out of the old war movies. At times the sheer volume of enemy aircraft on your case is quite mind-boggling, and this is where the game really excels – the action just doesn't seem to let up!

While the gameplay is addictive and exciting, 1942 falls a bit short in other areas – most notably the graphics and sound. Bearing in mind that this is the same console which gave us *Alone In The Dark* last issue, the visuals are a bit disappointing. Still, this is an accurate conversion of a true arcade classic, and as such, it's pretty damn fine.

1942 is a great example of how to make a simple, entertaining game without relying on graphical frills. Worth investigating if you're lacking a decent vertically-scrolling blaster. ■

2nd Opinion

Rating

→ Ah... the good old days of gaming! When graphics were pants and gameplay was king... er, anyway, 1942 is a classic arcade game and this is a great conversion. It might not measure up against more recent titles for long-term play but it's great fun!

Conker's Ba

By now you should have had plenty of time to finish Conker's Bad Fur Day... What's that? Some of you are still at it? You're stuck? Really? Well, it's lucky for you that we're giving you a guide to this top game now, isn't it? Sit back, read on, and be enlightened...

After one too many drinks at the local, getting home, on your own, is never a pleasant experience. What you'd really like is someone, maybe a friend, to walk you back to the safety of your lovely abode. Now, if you happen to be a walking, talking, foul-mouthed red squirrel, who's currently blowing rainbow chunks all over the nice

clean streets, you're going to need all the help you can get, especially when you consider what's ahead of you.

This certainly is going to be a bad fur day...! From the outset, we know that, somehow, Conker becomes a king. How? It all begins when Conker decides to join a bunch of soldiers for a wee drinky, just before they pop off to fight a war. A couple of rounds and

an empty wallet later, Conker is staggering around the streets outside the Cock and Plucker, aimlessly trying to find his way home.

Fade to black. Conker wakes, hungover and ill, in a strange part of town. Well, a field! Where now? Now, it's all up to you...

Chapter SCAREDY BIRDY

Time to wake up. It's going to take more than a 'hair of the dog' to get over this hangover and, as you soon notice, controlling Conker when he wakes up shows you that he is not yet in the mood to make it through the day. To sober him up, make your way left around the field until you can get inside the fence and meet

Birdy. Birdy is the scarecrow who, at certain points in the game, points you in the right direction or gives you a handy hint. During your first meeting with him, he introduces you to the wonders of the Context Sensitive Buttons (those large round pads on the ground that have B stamped upon them).

These pads give you exactly

the right tool or talent required for you to complete a specific task, thus eliminating the need to remember a lot of complicated moves. Whenever you stand over a Context Sensitive Button (or CSB as they will be known from now on), a lightbulb appears over your head and then all you need to do is press B! For now, this first pad only grants Birdy an extra bottle of booze (drunken git) and a canister of Helium (for comedy value, obviously) so make your way out of the field via the newly opened gate, where there is another CSB awaiting you. This one gives you a nice dose of effervescence to cure you of that nasty 'so-

hungover-I-think-I-might-vomit-and-cry' feeling!

The first thing to do now is head for the river and swim for the small island at the edge of the waterfall.

NOTE: As you progress through the game, all Conker's new abilities are explained to you. In many cases they are only used for that

specific section and, once performed, never really need to be used again. So any new talents don't really need to be explained here in this text. And: no, we're not just being typically lazy journalists!

(Above) See that pad Conker's standing on? It gives Conker special powers, it does!

Conker's Bad Fur Day: Walkthrough

Chapter GARGOYLE

Using Conker's helicopter tailspin move, make your way around the cliff-face from platform to platform until you meet the gargoyle at the top. Before you have a quick chit-chat with him, pull the lever at the beginning of the bridge by jumping up and grabbing it. This opens the locked door that you passed on the way up! Anyway, that gargoyle...

Firstly, he's a miserable bugger and isn't really in the mood to let you pass. In fact, if you get too close to him he smacks you right off the side of the bridge sending you straight to the bottom of the waterfall.

[Above] Careful there Conker! Falling down that chasm might hurt a bit!

Remember that in this first stage, you cannot die. This means you can fall as far as you like and won't end up looking like pavement pizza at the end of it all! If you do fall to the bottom of the waterfall, a nearby tunnel leads you back to the grassy area where you began the game.

Make your way to the door you opened, either by jumping back down on the platforms or by climbing up again if you got thumped by the gargoyle. Once inside the door it locks behind you and you are going to need a key to get out. There happens to be one in the locked room

(rather handily) but he a nippy little bugger who won't stand still. After a few failed attempts to grab him, Conker suddenly remembers that he has a frying pan which he can use to pacify that key with! Do so and use the key to get out of there. Now go and revisit the gargoyle and press B to smack him with the frying pan too. Although this won't affect him much, he unfortunately laughs so hard he overbalances and falls to his doom.

The impact of the gargoyle hitting the ground sets off a rockslide which blocks the exit behind where the gargoyle was sitting. To get out of this mess, jump onto the big boulder and jump again onto the wooden platform off to the right. A CSB grants access to a dynamite plunger that gets rid of that big boulder. You can now leave this area, but be warned, from now on you are open to injury! To help you out though, there are chocolate segments all over the place that

fill up your energy bar if the need arises!

Actually, while we are on the subject of death, we may as well talk about the main man himself. When you die (and don't worry, YOU WILL) for the first time, Conker meets the Grim Reaper. Strangely, this Grim Reaper goes by the name of Gregg. Oh yes, and he's a right short-arse too. He's not too happy with squirrels because, like cats, they have more than one life. As long as you have squirrel tails

(basically extra lives that are littered throughout the game) you can die as often as you like. With that information out of the way... on with the game!

Meanwhile, up in his castle, the evil Panther King has decided he needs help with the three-legged table that keeps spilling his milk. You'll understand what this means to you later on...

GUIDE

Chapter MRS BEE

Follow the trail of choccy down to the signposts that say Nasty/Nice. If you head towards Nice, you meet the Queen Bee who is sad because some wasps have nicked her hive. To get it back (and earn some all-important dosh in the process) head towards the wasp nest that is past the signpost in the Nasty direction. Follow the path until you get to the nest which has the queen's hive outside. After picking it up, the wasps come after you. All you have to do is leg it back to the queen and deliver the hive back to her. Be careful not to drop the hive or slow down, or the wasps stick something sharp in you! If you do drop the hive, it gets carried back to where you found it and you need to start again. Once you've returned the hive, the Queen gets rid of the wasps (with the help of a bloody big gun) and pays you a handsome reward.

Cross the nearby bridge until you get to another CSB. Here, Birdy appears and offers you an instruction manual in return for \$10. After paying him the money, Birdy's nasty stink make the animated cash come running right back to Conker. If only all money did that! Anyway, the book you get from Birdy teaches you

how to use your slingshot. You need to use this immediately as the Scouse dung beetles nearby have decided to kick the s*** out of you, simply because they can! Once you've shot them all down with the slingshot, a door opens behind them. Off you go then...

At this moment in time we learn that the Panther King's resident mad scientist has found a way to steady that table...

[Above] This is the section where our red-pelted hero must scurry back to safety with a beehive while being chased by a swarm of angry wasps. One slip and you're toast!

[Left] Feed the cheese to the ravenous rat for some explosive results!

Chapter MARVIN

On the other side of the recently-opened doorway, you find yourself in front of a huge barn. To the right of that barn is a problem you might want to sort out. Jack is a metal box with an even bigger, fatter box on top of him. This is all thanks to a foul mouse called Marvin who burps and farts and who is scaring this bigger box. Jack sends you to the left of the barn where another box called

Burt is waiting to open a paddock full of cheese for you. Like keys, cheese hates to be caught, so you need to give them a taste of your frying pan. Take a piece of cheese back to Marvin, timing your run to go under the jumping boxes that may leave you feeling flat, and ram the cheese down Marvin's throat. Now do this twice more. Why? Well, because the greedy mouse (or rat, we're not exactly sure) then goes the way of Mr Creosote and

bursts like a balloon, showering you in messy mouse off! The upside to this is that the bigger box can now get off of Jack. Jack, in return, then informs you that something cool awaits you in the barn. To get inside, climb upon the boxes, up over the guttering, up onto the roof of the barn and search for small ledge with a button on it. Pressing this button opens a door around the back of the barn. Collect the cash before you leave and then head back to where you found the cheese paddock. Follow the path past this and head towards the back door.

Chapter MAD PITCHFORK

It seems everyone's against Conker today. Once inside the barn, the rather mean looking haystacks decide to lock you in. To make things worse, a bunch of the local rednecks take a disliking to you and decide to give you a good 'ass-whupping', which doesn't

sound pleasant at all. If you make your way over to Franky the redneck pitchfork and friends, he attempts to give you a right seeing to. To stop this onslaught, avoid Franky and try and stay between him and one of the haystacks until he decides to throw himself at

you. When he strikes make sure you jump out of the way so that he destroys a haystack instead. Repeat this process until all of the haystacks are no more and Franky gives up. Now a laughing stock, Franky has nothing else to do but hang himself. But as he has no throat to choke or neck to snap, he might be hanging around for a fair old while...

Near to the entrance to the barn, pull on the lever that opens another door in the top part of the barn. This door also releases the King Bee who looks about as rough as Conker did first thing this morning. Exit the barn the way you came in to get a cut-scene of something nasty that was lurking up in the rafters. An angry-looking, giant haystack, and no, not the late wrestler!

Once outside the barn, pop over and meet the King Bee who fell out of the barn. He's an idiot who is obsessed with a Sunflower with huge... er, 'assets' and it's this obsession that got him into trouble with his wife, the Queen, who has kicked him out. For a bit of cash, you need to help him out. He wants five swarms of bees to send to the Sunflower and it is up to you to find them. For now though, forget about the bees and the boobies. You've got to get inside that barn to take care of a little unfinished squirrel business!

Chapter BARRY AND CO

To get into the barn through the new entrance, carry on past the King Bee until you get to a small area that has a large, battered wooden jumping crate. This guy pauses for a while below the new entrance and it is during this pause that you need to perform two crouch jumps (the ones that give you a bigger lift) to get on top of the crate and then up on to the ledge with the entrance. Now get your furry-tailed ass in there!

Inside the barn, you find yourself up in the rafters, which is also where a few angry bats are. As you carefully inch your way across the beams, these bats try to knock you off. Luckily for you a lightbulb appears that signals a new ability. If you get the timing right, just before the bats swoop at you, press B and you suddenly find yourself carrying a blowtorch that those bats won't like one bit. Stay alert, inch your way across and toast those bats! Alternatively, use the jump and tailspin to leap across the platforms, avoiding the bats that way. After all that, you come to a CSB. Press B while standing on it to pull out a set of knives. With these knives you must try to cut the rope that Franky is hanging by (and you can also take care of any bats you missed). Once you have cut Franky down, jump down into the barn to meet up with 'your new best friend' and get ready to put that giant haystack to bed!

Chapter BUFF YOU/HAYBOT WARS

To defeat this guy you need to be on Franky's back. As the pitchfork attacked you before, so you must use the B button to have him launch the same assault on the Haystack, aiming for his butt! Each attack causes flames to spring from his body, and do this three times and you notice that underneath all the hay lies a killer cyborg skeleton! The cyborg's anger at being smacked causes the floor to break up and sends all three of you spiralling into the darkness below.

Once you have regained consciousness, you find that the fall has injured Conker's leg, which is not good because the cyborg is now really angry and

starts launching rockets at you. The only way to escape these effectively to hop back onto Franky. In the same way that you made Franky destroy the small haystacks in the first section of the barn, you need to get the cyborg to break the water pipes. To do this, simply hop behind the pipes and wait for the bad guy to launch his rockets. This releases water and then the cyborg approaches you. Guide him towards the pool of water and watch as he gets a shock! This causes him to back into the centre of the room and rotate, revealing a 'Do Not Touch' on his back button. Time it right and jump as the button comes

around, causing a lightbulb to flash which makes Conker punch the button, causing the cyborg to lose his cool (and the odd limb). Repeat this routine twice more (using a different water pipe each time) and the cyborg totally goes to pieces!

Chapter FRYING TONIGHT

This ain't over yet! There are loose electric cables and rising water to deal with now, and trust us, these two don't mix well and you certainly don't want to be there if they do. Head for the ladder ahead of you (look for the EXIT signs nearby) and climb up to the first CSB. This gives you more knives and you need to throw them at the cables that are sparking nearby. Aim and throw so that the three nearest you are severed (one is quite low down). You know if you have been successful as the water beneath you stops flashing with electricity. Once the water is safe to dive into, swim across to the second ladder and up to the next CSB and proceed to do the same with the next set of cables. These are more difficult to cut (as they are further away) and the water level is rising faster. If you manage to do this in time, the water becomes safe to swim in once again and you can reach the ledge opposite you to exit the area.

Go through this exit to get back to the barn where a rather odd-looking monk is reading from a stone tablet. Get some choccy if you need to and then hop onto the tablet. He doesn't like this and throws you up into the air. While in the air, move yourself forward to get to the higher platform. Here you find cash, choccy and the way out!

Chapter SLAM DUNK

Upon exiting the barn, you find yourself on a ledge with a ladder. As Yazz once said, the only way is up! Climb this ladder and each successive one, higher and higher and higher (dodging those nasty wasps along the way) to get to the very top. What goes up must come down, though, and you should find yourself facing a small diving board. Carefully edge your way to the end to collect the choccy.

Another section of chocolate is hanging in mid-air over the abyss

below and you have to grab it. It's important that you don't just jump as you won't get it that way. You must instead hover to it using the tailspin and then a lightbulb should appear. Hit B fast and watch as you turn into a giant anvil that hurtles towards the large B button below. Once you've hit it a door opens elsewhere and it is up to you to climb out of the bucket thing you are in, down the ladder to the barn and from there to the ground...

Chapter SUNNY DAYS

Now it's probably time to help that King Bee out, despite the fact that he is a bit of a loser! You need to speak to the Sunflower once you have spoken with the King again. Head past the jumping crate and across the bridge to see her. For some reason, she doesn't take to Conker straight away, something to do with his big tail. Anyway,

head back to where the battered wooden crate is moving around to find a swarm of (pacifist) bees who want to help you pollinate the Sunflower. All you need to do is lead them to her. Then there are four more groups of bees to search for and they are in the following places:

- 1) One group resides near the hole in the tree where you came into the barn area.
- 2) The next is near the switch on top of the barn that opened up the loft entrance.
- 3) Another swarm can be found next to the bucket on top of the barn. You need to walk around the edge of the bucket to reach them!

- 4) This group of bees is found near the paddock that was full of cheese. Leap onto the ledge near Burt and follow the ledges anti-clockwise. (There's also a hidden area near here - a cave containing ten squirrel tails. Leap around the rocks until you see the lightbulb, then hit B to

smash the rocks and reveal your hidden bonus!)

Note that if you walk through deep water, the bees leave you and return to their original position. Also, if you walk too fast, the bees sometimes get lost along the way, so patience is the order of the day here.

Once all five groups of bees have been found, the Sunflower reveals her 'charms' and the King finally 'gets it on' with her! If you feel like it (and depending upon how much money you have) you can bounce around on the sunflower's boobies in order to bounce up to the ledge containing some cash.

Chapter

POO CABIN

Conker's dilemma hasn't improved much. Somehow, he's managed to agree to get a load of cows to crap just so that he can collect some dung balls. Why the hell would you want dung balls? Well, you'd be surprised. First things first though, get down that trapdoor! Stand over the door and – 'ting' – a lightbulb appears. Press B and once again you become an anvil. This smashes open the trapdoor and sends you down...

You find yourself in a passage that leads up a massive room full of ropes. Scramble up the first few ropes until you come to a ledge. Note

that the ropes can be a little difficult to get to grips with. As you leap from rope to rope you might want to angle the camera behind you so that you can judge the distance better. If you do fall down into the blackness below, you're put back in the house by the trapdoor without any loss of life, which is nice!

Walk across the ledge and leap across to another rope – don't leap as the sewage pours out of the pipe as it may knock you off course. From this rope leap and then hover into the hole in the wall with the poo pouring out of it. This leads to a passage that, in turn, meanders out into a field.

[Above] No, your eyes do not deceive you. That really is a large, ball of crap. Can you smell it?

This is quite tricky but the basic idea is to bounce once off of her breasts, hold down A for the next two bounces (making sure that you aim yourself back onto her ample frontage each time) and on the third and final massive jump, hover your way over to the cash. It's a lot harder than it sounds and may take a bit of practice, but it is possible!

Time to leave this place and head for one that stinks of poop. Not the best place to go next, but that's just tough. Leave via the way you came in and now head off into the land where only dung beetles go without a gas mask! Once kitted up with your very

own gas mask (which happens automatically) head towards the little cabin.

As for the three-legged table problem, it seems that the mad scientist has found a solution. They need to bridge the gap with something just the right size to steady the table... a red squirrel. Hmm, who do you think matches that description? This means that all the king's men are now on the lookout for our hero Conker!

Chapter

PRUNED

Guess what's in the field? Yes, that's right: a very angry bull who absolutely hates the colour red. Hang on? Isn't Conker red? Sadly, yes, he is and that's going to make things very difficult for you. Firstly, ignore the bull for now and get yourself up to the top of the prune juice container. As

you climb up each step be careful not to get a ball of dung in your face. Nobody likes that! At the top there's a giant disc that Conker must run clockwise on in order to open the tap that releases the prune juice.

Chapter

YEE HAW

But how to get the crap? Well, you might notice that a nice big target has appeared on the main field. You've got to get that bull to chase you so that it to rams that target! Conker's got to be fast as the bull takes no prisoners. If he's successful a lovely cow comes to eat some grass. But she's meant to drink the prune juice! The best way to get her to do that is by doing the following:

Another target appears and this, as before, means you have to get the bull to ram it. When he does he gets his horns stuck in the target for a while. Use this short period of time to jump onto his back and then aim him with your control stick (it's a struggle) at the cow. Press Z and the bull

takes aim and rams that cow! That kind of behaviour obviously doesn't make her happy so she decides to stop eating the grass and instead drink the prune juice. It's not long before she gets the 'screaming squits' and has to go and take a rather runny dump on the grating in the centre of the field.

Once the cow has finished her business you need to get rid of her, so aim the bull at her again and watch her go SPLAT! Hmm, gory!

Now repeat this process with the next two cows – they may need a few more whacks with the bull before they go for a drink, but once all three bovines have relieved themselves and been duly splattered the bull comes to a smelly end when the metal grating gives way beneath him.

GUIDE

66

Chapter SEWAGE SUCKS

The grating into which the bull fell is now filled with poo. If you dive in, you find yourself in the area you'd been climbing around in before, now full of liquid plop. With your water wings still on, you won't be doing any diving in this stuff so paddle your way across to the other chamber and find the CSB. This gives you the confidence to swim under... er, water and the instruction manual tells you the rest! Swim back through the lovely brown stuff (look out for the drowned bull on the way down) and search around for some cash

which is stashed away on a small ledge in the area you dropped into when you first came through the trapdoor. Then head back down to the large black hole that sends you back to the small house.

Once in the house, head outside and meet up with the dung beetle who welcomes you with a big round ball of excrement. Roll this first ball to the left up a little incline that leads to a broken fence. As you roll the poop over the edge, past the fence, a little spiky soldier

on the head, rendering him completely harmless for when you have to get past him later.

At this point you can either carry on rolling dung, or you can jump down to where that

spiky fool is staggering around blind and throw the switch he was guarding that empties the nearby pool. The reason you need to do this is because it disposes of all the other spiky soldiers who are swimming in the pool. If you try to swim past them, they approach you and stick something sharp and nasty in you, bouncing you out of the water.

You need to complete this

stage before you can finish the problem with the dung beetles. This is because after the battle with the singing poo (we'll get to that soon enough) and the various booby traps that follow, there are some guards waiting for you. They don't allow you to pass unless you have at least \$1000 and you can collect a lot more of this money in the following stage. So let's get this stage out of the way, shall we?

[Above] Squirrels aren't widely known for their swimming prowess, but our Conker isn't too bad in the water... until he runs out of air, that is!

Chapter MRS CATFISH

Once the pool has been drained, walk around the edge and enter the small tunnel. On the other side there's some rather snobby catfish. They offer you a proposition: if you can get rid of the rather angry-looking bullfish, they will give you ten percent of their cash that is locked in the nearby safe. Once the bullfish has been 'wound up', the catfish promise, they will return and open the safe for you!

[Above] These catfish look fairly harmless, but they're constantly trying to get Conker to run dangerous errands for them.

Chapter BARRY'S MATE

From the edge of the pier, jump into the lake and follow it along until you get to where the bullfish is. On the way you pass a waterfall, and if you stop off here along the way, then behind the waterfall a tail and some choccy can be found. Near to the bullfish, under the water, is a small tunnel that you must swim into. Once inside swim quickly to the surface and prepare to meet up with someone who is quite literally 'two-faced'!

In the centre of a series of cogs and pulleys is a giant cog with a dumb look on its face and next to it, a smaller, grumpier-looking bugger, called Carl (although he also has another personality that goes by the name of Quentin). He's the guy (or guys?) to speak to. Basically, you're being asked to find the three missing cogs that are needed to make the mechanics of this machine work. This machine is used to get that big bullfish out of harm's way and so you really have no

choice but to find them. Here's how you solve the puzzle...

Firstly, you need to climb the inside of the tower. After chatting to Carl/Quentin, a platform starts operating on one wall. Get on this and travel up the various ropes and across the narrow beams until you get to a small ledge. The rope section needs quick-thinking as you need to jump from the corner of a platform and then hover over to the rope. Move up quickly or you are liable to slip off!

As for the narrow beams, well, this takes time and patience! Conker wobbles every few steps as

Chapter COG'S REVENGE

Now that the underwater gate is open (as you swim in from the entrance) you can swim through it into a long tunnel. As you head through, be careful of those spiky swines and then swim up to the surface. Like cheese and keys, cogs hate to be collected and so, once again, it's time to pull out your frying pan. The first cog (of three) is right next to the surface. Once she is knocked out, pick her up, swim back to Carl and place her on the machine. Repeat this twice more (the other cogs are found further in on the other side of the tunnel and are a little bit quicker on their... er, teeth, so you may need to chase them.)

Once all three cogs are on the mechanism, jump onto the disc in the centre of the room, and, like you did with the prune juice tap, run clockwise to get the machine going. Now... watch what happens! With the bullfish tied tight to the bottom of the lake and Carl well and truly 'buggered', it's time for you to venture outside and meet back up with the catfish by the pier. They are rather protective of that safe and so only they can open it for you. This means you have to lead the catfish back up the river to the safe. Even though the bullfish is tied up, there is now a new problem! Those spiky goons are back again, so as you swim up to the safe, be don't attract their attention! Once there, the catfish open the safe and you can finally get inside!

Chapter BLAST DOORS

The first task for you to do inside involves opening the safe. This is due to the fact that the cash inside doesn't really want to be caught – possibly because he's an idiot! After he makes a run for it, the floor beneath you seals and a CSB reveals itself. In front of you is a combination lock, but not the conventional kind, instead you must spell OPEN by firing your chestnuts at the letters printed on the disc. This is not as easy as it sounds because of a rotating dial that only reveals one letter at a time! You can only make a few mistakes before one of the spiked things bounces right at

you. If you are not quick enough to dispose of them, they whip a piece of chocolate off your energy counter, so it takes careful shooting to hit the right sequence and open the floor. If you do die at this point, always remember that there is a tail waiting just outside under the waterfall!

you try to inch your way across. This can be very off-putting at first but you simply have to cope with it! To make things worse, bats take swooping shots at you, so, like before, you need to get the timing right on your blowtorch move (again, this can be accessed once the lightbulb has appeared above your head). To be honest, the easiest way to

[Above] Nothing quite ruins your concentration like suddenly being set on fire. Conker needs water, quickly!

tackle the narrow beams is to jump and hover your way across

them, although we reckon this is probably cheating!

Once at the small ledge near the top, you should be able to spot a huge lever that you must jump and hover over to. Once pulled, this opens a gate which you'll find by the underwater entrance to this tower.

After pulling the lever you land on a spider's web. You can now either go straight down and continue hunting for the cogs, or, you can make your way further up the tower and hunt for more cash. If you make your way to the very top and walk around the ledge (careful of the spiky gits

patrolling the ramparts) then there is another wad of cash waiting for you. This can be very tricky to get to, but it is possible. Once you've got the cash, don't

worry about getting down, just jump off the outside of the tower to land, safely, in the pool next to the bullfish. Then all you need to do is swim back inside.

[Above] This cog is probably the rudest character in the game, but also the funniest. Some of the stuff he comes out with would even put the 64 MAGAZINE team on deadline day to shame. Yes, it's really that bad!

GUIDE

Chapter

CLANG'S LAIR

68

Once inside the safe, it's time to do your fish impression as it's all underwater from here on! Another CSB allows you to put on a helmet with a torch. This is rather useful as you need it to see the coloured lights that show around the openings to the various tunnels.

As you dive down this rather long shaft (no puns please), you should see the first rather nasty metal fish thing with big teeth. Stay away from these (as there are many) because if they get close they snap at Conker and that's not good for his health! This is a very long shaft, so watch out for the ledges on the way down that contain air vents. These replenish your oxygen supply. When you get to the very bottom, take another blast of air from the vent and search for the tunnels which are lit up by green lights.

The upper of these two tunnels leads you to another cavern. Swim to the surface and with a handy CSB, replace the lamp battery. Dive back down and swim through the blue-lit upper tunnel. Follow this to another cavern and at the surface, pull on the big lever. This opens up yet another set of tunnels. Swim back down through the upper green tunnel back to the previous room. Grab a little more air and then swim through the upper yellow tunnel and up another large shaft. Remember to search for those air vents on the way up as your breath won't hold out for the length of the shaft. Once you've surfaced, leg it along the metal pipe until you bump into those darn fire imps. Time for some impromptu fire-fighting!

[Above] Conker's a child of the Eighties, and remembers the miners' strikes well. And he looks a bit like Arthur Scargill in that hat.

Chapter

PISSTASTIC

Fire imps are rude, stupid and like just about everyone else in this fecking game, out to get you for no good reason. They seem to think you carry an "Extremely Flammable" warning and they are just the imps to test it out. So, what's a squirrel to do? Well, if you look back to where you first met the imps, you should see a big barrel of booze. Run under it and press B, and Conker is rewarded with a nice big gobfull of booze! Once he's fully loaded, our hero can do battle – and we don't fight fire with fire in this game! Oh

no, we fight fire with pee!

In his drunken state, Conker can be a little tricky to move around, and he's slower too. Get yourself somewhere near to the First Aid box (you'll see why in a bit) and press B. This causes Conker to open his zipper and then by pressing Z, he lets rip with his urine which you can splash about with the control stick. Aim carefully and attempt to extinguish the imps' flaming bodies. They turn black and then to dust once they've had enough!

If you run out of the old 'amber nectar' before you've sorted the imps out, stagger over to the First Aid box and press B to get a hangover cure that makes you as right as rain. Then, like before, get nice and drunk again and finish off the job. When there are only a few imps left, the next part of their nefarious, underhand little scheme comes into action.

Chapter

BRASS MONKEY

This boss isn't that hard to defeat. Basically, this old boiler has the a huge pair of, er, round dangly things, made of brass and

[Above] This old boiler (pun intended) has a bit of a sensitive problem...

'polished to the Nth degree!' These are his weak spot, because as most guys will tell you, getting whacked in that most sensitive of spots will bring anyone down!

So... to get rid of this big, bad boiler you have to run to one of the corners of the room. In each corner is a chain which, when pulled, releases a lot of hot liquid onto the grid in front of it. Wait by this chain for the boiler to walk up to you. To reach the chain you have to do a crouch jump. When the boiler is right in

front of you, he starts to blow red-hot flames and if you time it right you can jump just before the flames touch you, pull on the chain and pour the liquid all over him. He won't like that!

This causes him to back into the centre of the room. At this point run over to him (next to his big balls) and 'ting' a lightbulb

appears which is your cue to press B. When you do, Conker pulls out a set of bricks and proceeds to make a special sandwich with them. Ouch! You need to repeat this procedure

Chapter BULLFISH'S REVENGE

Outside, those bleeding catfish are waiting to take their money back and give you your ten percent. That means you are only going to get... \$10! Ten dollars? After all that effort? What a bunch of old misers! Hang on though – it looks as though the bullfish is breaking

loose and the cats have already spotted this fact, because the next thing you know they've done a runner (or should that be a 'swimmer'?)

It's best that you leave too. As you approach the mouth of the river that leads to the pier, the bullfish breaks free and gives chase! Whatever you do, don't swim for it – you're not fast enough. As the bullfish passes the catfish along the way, he stops to tear them to pieces which buys you a little time but not much. The best thing to do is to leap from the water and hover as far as you can before you splash back down. This

technique gives you a good useful lead.

Once you reach the pier, the game jumps into a cut-scene to show the climax to this part of the adventure. Conker scrambles up the pier as the bullfish approaches and just when it looks as though our plucky squirrel is fish food, he leaps onto the pier and legs it. The bullfish smashes up the pier behind Conker (Godzilla-style), still giving chase, and Conker, finally, dives for safety. The bullfish is not slow enough to stop and as a result smashes face-first into a wall. Safely on

dry land, all that remains for this chapter is to jump onto the bullfish's back where you find a lot of cash waiting for you. By now, you should have nearly enough to pay the toll later on in the game!

Chapter GREAT BALLS OF POO

Now you need to go back to the 'place of poo' and continue rolling those dung balls! Back at the cabin, you find another dungball is waiting for you. Take this and push it round the back of the cabin and up a little path that spirals around a small mountain. Be careful to avoid the other dung beetles as they attack you if you get too close. Wait until they take a very quick nap in their caves before you roll past them. At the top of this path, Conker automatically sticks a piece of TNT into the poop and rolls it off the edge. Underneath the path is a very large dung beetle with an open mouth. In fact, it's open just wide enough to get a ball of poo

down... with explosive results! Run back down the mountain again and get another ball of dung and this time roll it up the path directly in front of the door to the cabin. Roll it past the spot where the big beetle was sitting until recently and push it up to the very top and into the doorway you find there. The dung ball runs down the inside of the mountain and crashes out through the previously sealed-up door below.

To escape, Conker needs to get his furry mitts on the ex-boiler's balls! Roll one over to a small

indentation in the ground and it reveals a doorway. On the other side of the door is yet another spiky goon. Use the other brass sphere to roll down on him and also to smash an opening at the other end of the corridor. On the other side of this you find your reward and once you've collected it, you are free to leave.

three more times, and it's important to note that once one chain has been used, it cannot be used again. Conker's last strike should knock the boiler's balls right off! As the imps on the inside try to get out, the resultant explosion finish the brass fellow off for good. Now: how the hell do we get out?

GUIDE

Chapter

CORN OFF THE COB

Once you go through this previously blocked door back down the bottom of the dung-heap you hear some distressing news – something is eating the dung beetles! Something big, something brown and something very, very smelly. Are you going to stop this thing? Of course you are!

The next thing for you to do is to feed that voice. It wants sweetcorn and so you need to oblige. Sweetcorn (like keys, cheese and cogs) don't want to be caught (or fed to monsters), so whip out your frying pan, whack one and collect it. When you've got the corn, run to the ledge which stretches out over the central pit to have Conker throw it into the swirling brown waters.

Keep an eye out for the giant hand that comes out of the water and slaps the ground – you don't want to get hit by it as it may knock you into the brown liquid and you then lose a life. After the first piece of sweetcorn has been 'sacrificed', make your way around the edge of the area (careful not to fall in) and watch out for falling poop – it really tangles up your hair! As you go around the edge, you find more sweetcorn which needs to be sacrificed (five more pieces to be exact) and once they have all been disposed of, the real villain of the piece is revealed!

Chapter

SWEET MELODY

The Soprano is an opera singing, poo-flinging, death-bringing pain in the ass! The only thing that can get rid of a massive turd like this is bogroll. Which is why the CSBs on this section provide you with something soft, strong and very, very long and it's up to you to use it. After each verse of the Soprano's song, he starts flinging poop at you. Get your ass over to the CSB and arm yourself with bogroll with a quick press of the B button. Since you are rooted to the spot, the only way to ensure the poo doesn't splat the life out of you is to try and throw some bogroll at the incoming turds! If you are lucky and time it

right, these missiles won't pose too much of a problem. However, keep an eye out for bits choccy in case you take too many hits.

To defeat the singing pile of bum-dough wait until he sings a long "laaaaaa". This is when his mouth is wide open and just perfect for you to shove some toilet paper down his gob. If you aim right, you can get him to choke. As with the sweetcorn, the first hit moves him on into a different area. The next time, it takes two shots of bogroll before he moves on and the third and final time requires you to throw three rolls into his gaping mouth! Each time he gets quicker and so

[Above] That's right – sing up, O Turdy One!

[Above] Once he hits a high note, chuck bogroll in the Poo's mouth.

Chapter

U-BEND BLUES

At the other side of the exit lies a big problem. There is an underwater tunnel you must pass through. To make things worse there are bloody big blades to get past, three in all! This is very tricky. INFURIATINGLY so! If you do get sliced in half (and you probably will) make sure that after you die, you collect the squirrel tail on the right before you dive back into the tunnel. A good tip is to stick to the sides of the tunnel as the gap between blades is bigger there. Don't wait for the blades to pass before you make a move, as Conker doesn't swim fast enough. Instead head towards the flat

of the blade and by the time it has passed, you should be able to swim straight through. Remember that this only works if your timing is right. To buy a little time, as you pass each blade, swim slightly in the same direction in which the blade is turning. Also, check your air as Conker's face goes quite purple when time is short so keep an eye out for the bubbles coming from the pipes, they are just the thing you need! This section basically requires a little luck and a lot of practice. Once you've passed this little problem, swim to the surface and paddle through the pipe and across to the small

platform. Below this platform is a spinning blade and across from the platform is a rope. Looks like you're going to have to jump and hover across to it. Scramble up the rope and the next surprise awaits you: the platform you have to jump to has nasty sharp teeth running anti-clockwise around it. As you jump, try to land between the teeth (for the obvious reasons) and then run in the direction they are moving. You soon come to a ladder that you can climb up to safety. At the top of the ladder, walk around the opening and across the gantry to meet up with some stupid-ass guards!

Chapter

THE BLUFF

At this point you have to have at least \$1000 to get past the guards, which you should if you've followed the guide so far. If you missed any then you may need to retrace your steps. Providing you have the dosh though, you can pass, although these guards have also been sent to look for a red squirrel and they happen to think Conker is one. How outrageous! Conker convinces them that he isn't a squirrel though, and is in fact an elephant, so the guards let him pass and the money he's paid them comes running back to him once he's safe. Neat trick, eh?

Chapter PRUNED

71

you must keep your wits about you! After the third time (and by now you've really got up his nose) he lets out a long scream that shatters the pane of glass behind him. Make your way over to the here without falling into the sea of poo and you find a lavatory chain for you to pull. When you do, this flushes our anal opera ogre away for good. At this point you can collect some more cash! With all of the brown matter flushed away, a series of platforms is revealed. Taking large leaps down (including hovering to get you across the large gaps), get yourself down to the exit!

At this point it's probably fair to tell you that Conker's girlfriend, Berri, is not in the best of moods.

The night before Conker stood her up and that knock at her bedroom door is probably him coming to apologise! Only it's not... instead Berri is confronted by a big creature made of rock. She thinks it's got something to do with Conker... it hasn't. She realises this when the creature belts her one in the face and drags her unconscious body away! Meanwhile, back with Conker...

[Above] That can't be good... Clear a path, everyone!

In the new chamber you can see a giant stone lizard head. To the left and right of it are two doors. The door on the left cannot be entered yet so make your way to the door on the right. This opens and leads to another chamber. In this chamber is a giant egg that you must make your way to. The path to this egg is narrow with a nasty, fiery death awaiting you if you fall off.

Also, you encounter some cavemen. The best way to

deal with them is to give them a taste of your frying pan. When you get to the egg, jump up onto the Monk's tablet and he sends you flying into the air. Use this to get on top of the egg. Once up there, press B to begin the hatching process. What hatches from the egg is a little cute baby dinosaur! Ahh, how adorable. And look! It thinks you're its mum. As you guide the baby further down the path, it eats the cavemen who try to attack you. Be

careful though as it lags behind so you have to be patient with it. Finally, guide the baby dino out through the door at the end of the path. You emerge into the first huge chamber via the door on the left that you couldn't enter.

Now that you are back in the larger chamber with a big baby dino, what do you do now? It seems the answer lies with that gigantic lizard head. But how to open it?

To open it, it needs a sacrifice. Now what could you possibly sacrifice... hang on, how about that baby dino? Why, it's perfect and you weren't too attached to it anyway!

Lead the baby to the altar in front of the giant head. When you reach the nearby CSB, pull out your slingshot and aim at the button on the ceiling to your right. This raises the concrete slab high above the altar.

Lure the baby onto the altar, right under the slab, and then rush back to the CSB. This time, aim to the right and fire. This releases the slab, flattens that baby good and proper, appeases the god, opens the mouth to the stone statue and reveals a large green tongue, which in turn releases another monk and allows you to carry on... phew!

Chapter DRUNKEN DISORDERLY

It's a change of scene for Conker now. After passing those guards, he finds himself in a prehistoric world. At the end of a path is a temple with a whole bunch of dinosaurs running about it. You must get to the top of this temple. To do this, try to run behind the path of the dinos. If they come at you, jump over them as quickly as you can. Round the back of the temple is a small door that leads to the next level. Again, run around to the other door, avoiding the dinos along the way. When you get to the top, climb to the apex of the giant stone face and, 'ting', press B! Going down?

As for the poor guy below you, well, he feels pretty flat when that stone statue lands on him. The first thing for you to do here is to get back on top of the stone statue that you fell in on. Once on top, give it another whack via the B button. This opens a little door beneath you. Next, head towards the nightclub that is facing the statue. Here's a tip: don't go through the middle of the drunken

stone boozers. They wake up if you do and then proceed to smack the crap out of you and throw up. Hmm, nice! Instead go around them. Edge around the side (it almost looks like a path) until you get to the bouncer by the door of the club. Ignore him for the moment as he's just as violent as the drunken mob nearby. Instead, grab the boulder that sits next to the bouncer and, moving around the edge, roll it towards that doorway you just opened. By passing through this doorway you can roll the boulder down the sloping narrow corridor. The boulder does the rest of the work for you. It rolls down, squashes the caveman near the bottom and smashes a hole into another chamber.

We're into summer now. Which is great, because that means the weather is hotting up, and we'd like this Scorezone section to do the same! Get cracking on packing these pages with the most incredible, remarkable – but preferably genuine – scores you can squeeze out of your favourite titles using your finely-honed gaming abilities!

This month's lucky recipient of a classy steering wheel is John Fisher from Bath. He has been inundating our office with more videotapes than a CCTV control room – and his scores were pretty good too! Well done to you Sir!

New Games Needed!

Fine, so there aren't that many new games coming out! That doesn't mean, however, that there are no games left to appear on these pages. There's loads of games we haven't got scores for yet. What about *Pokémon Stadium 2*? *Conker's Bad Fur Day* scores would be nice as well!

Scorezone Challenge!

Here's a challenge for you! On *Conker's Bad Fur Day*, the multiplayer 'Beach' requires you to kill or save as many Frenchies as you can in the limited time period. So, depending on how much you like French-speaking rodents, we'd like to see the highest amount of rescues/kills possible... Yeah, like last month, we're that keen!

THE ULTIMATE PLAYER

There can be only one! Well, only one a month anyway. Every issue the ScoreZone gaming champion who picks up the coveted accolade of Ultimate Player also wins themselves a rather spiffy Top Drive 3-in-1 Steering Wheel from Logic 3! This cool piece of kit is compatible with your N64 (obviously) but also works with the PlayStation and the now antique Sega Saturn, so it's perfect for anyone flirting with more than one format.

Any readers not quite adept enough to make Ultimate Player can get the Top Drive wheel for £44.99 from Logic 3 on (0208) 902 2211!

64 SOLUTIONS CHEATS HOTLINE

0906 4664493

Okay... by now you'll have realised that in our A-Z of Cheats we've got pretty much every N64 hint, tip and code there ever was and because we update it every month you can be sure that if there's a cheat out there then chances are it's in the A-Z.

However, this does mean that you only get the new cheats once a month, so if you're one of those people that absolutely has to have the new cheats the day they're discovered then you might be interested in this...

The 64 SOLUTIONS Cheats Hotline holds all the latest cheats, tips and codes for the N64 and the Game Boy Color and it's accessible via telephone, 7 days a week, 15 hours a day. So if you're really stuck and we haven't got the cheat for you in the A-Z, then it's worth giving our games specialists a call.

Open 8am to 11pm.

IMPORTANT: Calls cost £1.50 per minute AT ALL TIMES. Call charges will appear on your standard telephone bill so you MUST seek the permission of the person paying the bill (if they aren't you) before calling.

Complete Money Back Guarantee

If you aren't totally satisfied with the solution given to you by our hotline staff, then immediately fax us your complaint on 01753 755930 to get a full refund - because if you ain't happy, we ain't happy!

A to Z

Of Hints, Tips & Cheats...

Need help? Then this is where to come! The following 12 pages contain a complete list – updated monthly – of every N64 cheat, hint and tip. New additions are highlighted in red. Updated cheats are in green.*

BANJO-TOOIE

Cheato's Pages!

We figure that you could hunt for these codes and earn them like a proper little gamer, or if you want, we can give you a few now!

To enter these codes enter CHEATO in the grid, and then follow on by putting the rest of the code in backwards! (Remember, if you haven't found these codes, you will have to enter them in backwards.)

CHEATO SREHTAEF (FEATHERS)

BANJO-KAZOOIE

Special Codes

Bottle's puzzles in Banjo's house give you special codes if you complete all seven of his challenges. Once you've completed the challenges, enter these codes at the castle in Treasure Trove Cove to get the cheat – the catch is: if you don't complete the puzzle, you can't use the code!
Note: You should enter NOBONUS to cancel the code.

BANJO KAZOOIE

Secrets Revealed!!

Once you've drained Treasure Trove Cove, the following codes can be entered at the Sand Castle. (If you don't know how to do this then read on... there should be a ledge with a bucket above the castle. If you fire two eggs into the bucket, the castle will drain itself, revealing letters upon the floor. To use these letters you must perform

the Beak Buster move on each of the panels.)

Some of these codes will play a cutscene while some will simply make a lovely noise.

The following codes will unlock six new eggs and the ICE KEY (ooohh), but please note that you can only get these if you have been to the levels these items can be found in. It's up to you to find a use for these extra items.

NOTE: When you enter a cheat that isn't egg or key related you should be advised that if you use more than two, Grunty (the old hag) will erase your game. Also, you'll need to type the word 'cheat' before each code, but you don't need to use the spaces!

1) NOW YOU CAN SEE A NICE ICE KEYWHICH YOU CAN HAVE FOR FREE
This reveals the Ice Key inside the Freezeezy Peak Ice Cave.

2) DONT YOU GO AND TELL HER ABOUT THE SECRET IN HER CELLAR
This opens a casket in Grunty's Cellar which holds a Blue Egg.

3) OUT OF THE SEA IT RISES TO REVEAL MORE SECRET PRIZES
This cheat raises Shark Food Island, where you'll find a Purple Egg.

4) A DESERT DOOR OPENS WIDE ANCIENT SECRETS WAIT INSIDE

HARVEST MOON 64

Running a farm is not an easy job. Especially in real life, let alone in a videogame such as Harvest Moon! To make things that little bit simpler for you, here are a few tips to make the job as easy as possible!

Chickens

Using the staircase, place all of your chickens on the roof.

JET FORCE GEMINI

The cheats have to be opened under the options menu and can be switched off and on once you have unlocked them. The following three cheats are awarded for collecting all those lovely ant heads:

Rainbow Blood Cheat

Requirements: Collect 100 ant heads.

Jet Force Kids Cheat

Requirements: Collect 200 ant heads.

Ants Into Pans

Requirements: Collect 300 ant heads.

Kill the Fish

If you really have to kill this fish you can with this simple method! You'll need to use some mighty big explosives, the cluster bombs or grenades should do, and chuck them into the pond.

Secret Flamethrower Ammo

When your flamethrower is running on empty search for some lanterns carried by Tribals! If you shoot at the Tribals, they'll drop these lanterns and you can then pick them up and use them to power the flamethrower!

Selective Ammo

To collect ammo for a gun that has none, select the weapon you want to refill and collect weapons from the dead. When collecting these objects, it will automatically supply your gun with all the necessary ammo you'll ever need.

Somehow, they will manage to get fed without you having to do anything. Another plus point is that they still lay their eggs!

Easy Medals

To win medals in the horse race you need to save the game the day before the race and then place a bet on any old horse (go on, spend all of your money!) Once you have discovered who won the race, restart the game from the beginning of that day! Now you should be able to foresee who the winner is and collect all those lovely medals!

How to get rid of your dog

If you are a bit sad and for some reason want to get rid of your pet dog, then bring it into the bathroom. Once inside, place the dog on the floor and it should walk into a black area (a hole?) Even though you shout, it won't come back. How sad!

How to get the empty bottle

Unless you find as alcoholic in the game, the only other way to find an empty bottle is from a guy called Rick. During the festivals in the town square (most notably the Flower Festival) you can collect this bottle and then proceed to keep medicines or liquids in it!

Make Ann fall in love with you

This is a sure-fire way to get the girl! Ann likes to chat so to worm your way into her heart you'll need to chat to her as often as possible. She likes things like wool, catmint flowers and also animals. This means you should bring her these things and especially show her your pet! One last thing, she loves cake!

How to make Elli fall in love with you

If Elli is more your type then woo her with fish, eggs and milk, and if you give it to her every day (you know what I mean!)

she'll soon fall in love.

NOTE: If you marry Elli, then her Grandmother won't die during the festival. She also won't die if you ignore her on this very same day!

Finish the third tower trial easily. When you reach the inner chamber in the second tower, collect the blue ring and the red ring. Upon reaching the third tower when all the controls are reversed, wear the blue ring to revert to normal and walk through the maze as if it was a normal area.

SHADOWS OF THE EMPIRE

For these cheats to work the game has to be on medium level. Start a new save slot on your controller pak and call it 'Wampa_Stompa' (each '.' represents a space). The name must be written correctly, including case, with one space before Wampa and two spaces between Wampa and Stompa. When you start the game, pause it, go to the options menu and

set the controller type to traditional.

View end sequence

End your name as _Credits

Plat as Wampa

On the "Escape From Echo Base" Level, repeat the above code and press C Right until the Wampa appears. As with the AT-ST, the D-pad is used to control this new-found character, push Down to give him Hamill type scars.

Play as AT-AT

In the second round of the Hoth Battle, when the scout walkers appear press Left on the D-pad and C Right simultaneously, then push Up. The C Right button will then let you change camera views until you see the AT-AS. Use the D-pad to attack.

Play as Stormtrooper

Repeat the code to access the wampa, but keep pushing C Right until the Stormtrooper eventually appears.

Play as the Tie Fighter

This requires you to collect all the challenge points on the medium skill level. Once you reach the Skyhook battle, hold C Right for five seconds to turn the Outrider into an X Wing. If you hold C Right for another five seconds, you will now be flying a Tie Fighter.

Cheats Menu

This code grants you access to a multitude of menu options.

1. As usual use a game with the player's name as Wampa_Stompa.
2. Begin playing on any of the levels and then pause the game.
3. Hold down all the C buttons, Z, L, R and the D-pad Left
4. Still holding these buttons, move the analogue halfway round to the left and hold it until you here a sound.
5. Release the buttons, press them again and move the analogue stick halfway round to the right until you hear the sound again.
6. Repeat stages 3 to 5 twice more each. Pink text should appear at the top of the screen. Use L and R to change the options, some of them can be changed by pushing the control stick up and down. Press A to activate them.

Extra options
Complete the game on the regular setting and you will get access to a level select and an option preview enemy ships.

STAR WARS: EPISODE ONE

Battle For Naboo
When is a video game not a videogame? The answer is when it thinks it is a DVD! If you want to unlock some DVD-style extra features on this new Star Wars N64 game, then enter: **KOOLSTUFF** on the code input screen. If the code is successful, you will be granted access to bonus art material. This material shows the early sketches and designs for the game.

TALKTOME
When this is entered you'll be given a full running commentary with insights into how the game was made, for every single level!

PATHTIC
This will give you infinite lives but, sadly, will also mean you are denied any medals!

EWERDEAD
This code will make every enemy die with just one shot. That will help you go easy on your trigger finger!

RUAGIRL?
This code will turn your ship a lovely shade of pink. Pretty!

OVERLOAD
This will give you advanced statistics for your craft.

NASTYME
Want to make the game tougher? If you do then this is the code for you!

LOVEHUTT
If you are really desperate, this code will make it possible to see the team that created the game. Don't worry, none of it is saucy!

DROIDEKA
If you would love to get your hands on the kind of shields the DroidEka destroyer robots have, then entering this code will grant you that wish!

STAR WARS RACER

To enter the following codes, select a position marked 'empty' in tournament mode. When you reach the name entry screen, hold down Z and enter the letters of the code by using the L button to select each letter. Finally, select End and press L again before entering your name as normal. Enter all codes on the name entry screen.

Dual Control
Enter RRDUAL to race using two controllers. To do this, plug your controllers into ports 1 and 3 and use them to control the two separate engines.

THE WORLD IS NOT ENOUGH

EXTRA MODES

Golden Gun Mode

To access this new multiplayer game where you must collect the three parts of the golden gun and then kill your enemy, simply beat the actual game on "oo Agent" difficulty. To unlock the Wildfire Mode finish the City Of Walkways 2 level on "Agent" difficulty in under 3:40.

FIRE EXTINGUISHER TRICK

Here's a cunning little trick for those of you who wish to create as much damage as possible without firing off any more bullets than necessary. On the first level, Courier, you'll notice that there are fire extinguishers on the walls. If you shoot one it sprays its contents everywhere and this helps in getting rid of any enemies! If you shoot it with a high-powered gun the extinguisher actually explodes!

EXTRA MULTIPLAYER LEVELS

If you want to access these extra multiplayer games/areas then simply complete the following levels as instructed:

Air Raid Level:

Complete the Masquerade level on "Agent" difficulty in under 3:15.

Castle Level:

Complete the Subway level on "Agent" difficulty in under 2:15secs.

Sky Rail Level

Complete the Cold Reception level on "Secret Agent" difficulty in under 3:15.

Team King Of The Hill Level:

Complete the King's Ransom level on "Agent" difficulty in under 2:20.

SECRET SKINS

If you want more than just your usual character skins to play with then try these handy hints:

Classic Skins:

Complete the game under the "Secret Agent" difficulty setting to unlock Tuxedo Bond, Baron Samedi, Oddjob, and Jaws.

Contemporary Skins:

Complete the game under the "Agent" difficulty setting to unlock Alec Trevelyan, Wai Lin, Max Zorin, May Day, and Christmas Jones.

Suit Skins:

Complete the Curious level on "Secret Agent" difficulty in under 2:00.

Civilian Skins:

Complete the City Of Walkways 1 level on "Agent" difficulty in under 3:35.

Covert Skins:

Complete the City Of Walkways level on "Secret Agent" difficulty in under 3:45.

Soldier Skins:

Complete the Midnight Departure level on "Agent" difficulty in under 3:05.

Scientist Skins:

Complete the Masquerade level on "oo Agent" difficulty in under 4:20.

WWF: NO MERCY

Hidden Wrestlers

If you highlight different wrestlers at the selection screen and then press the C-Left and C-Right buttons, you'll be able to access some really cool secret wrestlers!

ZELDA: MAJORA'S MASK

hieving Bird Problem

If you get hit by the bird in Termina Field you will lose one of your items. Thankfully, you can get it back. All you have to do is go to the Curiosity Shop at 10:00 (PM) and buy it back from the teller.

Blast Mask Protection

While wearing the Blast Mask you would normally get hurt when you make it explode, but if you hold down the R button to put your shield up, you won't get any damage when you blow

yourself up.

Normal Link in the Termina Field

To do this you have to buy a magic bean and a bottle of water and grow it in the Observatory Area (outside, where you get the Tear of Moon).

Warp Ahead 12 Hours

Play the song entering the keys C-Right, C-Right, A, A, C-Left, C-Left. This will play a song that warps you ahead 12 hours. This can be used at any time in the game.

Slow Down Time

If you play the Song of Time backwards, all time will go at about 1/3 its normal rate. This is very useful for long dungeons and exploration!

Beat the Ikana Knights Easily!

Insure that you have to get the Bunny Hood before you do this and then go to Ikana Kingdom. When you find and begin to fight the two knights quickly put the mask on. If you play the music they will begin to dance and march. Change from the mask so that you can use your sword and attack them (This strategy does not work to Ikana King however)!

Broken Signs?

If you've destroyed a sign, play the Song Of Healing: C Left, C Right, C Down. The sign will then repair itself.

The complete guide to every N64 game ever reviewed!

Welcome to the Nindex! This section of the magazine contains information on every game 64 MAGAZINE has ever reviewed in an ultra-condensed form, allowing you to compare the different titles at a glance.

If you want to get the lowdown on any Nintendo game that's been covered in a previous issue then this is your one-stop buyer's guide. The Nindex is updated each month, and every so often we review the scores to see if the games still deserve them. If you need game information then this is exactly where you need to look!

90% AND ABOVE

If a game gets a 64 Sizzler then it's a game that's well worth buying.

95% AND ABOVE

The Gold Medal Award only goes to those few games that you absolutely *must* own!

Game Name	Company	Icons	Issue	Score	Comment
1080° Snowboarding	Nintendo	1-2 ● ● ● ●	17	82%	The best snowboarding game on any machine!
40 Winks	GT Interactive	1-2 ● ● ● ●	32	68%	Decent but unoriginal platformer with some annoying gameplay flaws.
A Bug's Life	Activision	1 ● ● ● ●	29	50%	Mediocre movie licence aimed at younger players.
Aero Fighters Assault	Video System	1-2 ● ● ● ●	15	20%	Abysmal, sluggish air combat 'game'.
